meeting Tuesday with Treasury Secretary James A. Baker 3d and other senior officials.

the control of the plan includes almost country and art in the bing the personal exemption to \$2,000, lower individual rates and the elimination of many popular. the elimination of many popular deductions and tax breaks.

the mean was prome Officials said the proposed three-tier individual income tax structure would call for a rate of 15 percent for low incomes, 25 percent for middle incomes and a top bracket of 34 or 35 percent.

They said there was discussion of bringing the top bracket down further, possibly to as low as 30 percent, or or account at 30 percent, but those ideas were Joseph Men Course

The proposal is expected to include a minimum tax for corporations. Sources confirmed that the administration has decided to permit gifts donated to charity, includ-CANAL Y VICE ing stock, to be deducted at their market value rather than at their Promotives ag original price plus inflation. Universities had complained that the to an in the same latter approach would drastically reduce their revenues.

Officials had discussed raising the personal exemption from \$1,040 this year to \$1,800. The desaid, would help Mr. Reagan em-phasize the "populism" theme be-cause it represents an added tax cut for millions of Americans.

Officials said Mr. Reagan would try to sell the proposal as both a break for average taxpayers and as a heavier burden for wealthy Americans and corporations that have paid little of no taxes in the past. But this effort may run into criticism because the president also has decided to restore a number of tax breaks for investors and the oil and gas industry. These tax breaks were curtailed in the Treasury Department's initial tax-simplification proposal, released last year.

In an effort to give the proposal some political momentum, an ad-ministration source said, the presi-dent is planning to "get out and really sell it fast" almost every day next week by focusing attention on the benefits for families and for average taxpayers.

Mr. Reagan intends to advertise the tax-simplification plan as the centerpiece of the "second Ameri-can revolution" he described in his second Inaugural Address, officials said. Republican political strategists said they were hoping the proposai would give Mr. Reagan a positive issue to campaign for after recent controversies that put the

White House on the defensive. The president can use tax simplification to "wash away some of the bad taste of the budget" fight, as well as the controversy over his visit to the German military cemetery at Bitburg, a Republican offi-

___ U.S. Seeking Inspection Of Israeli Nuclear Sites

By John M. Gosoko

Washington Post Service WASHINGTON — The United States has asked to inspect secret nuclear installations in Israel to verify that American-made timing devices, allegedly obtained by surreptitious means, have not been used in making atomic weapons or re-exported to other countries. U.S. and diplomatic sources report.

The devices, tiny switches known as krytrons, provide the precise timing necessary for nuclear explosions. They are also used in oilexploration equipment and medi-

BUSINEE OF According to the sources, Israel has not replied to the formal requests for inspection made by the State Department. They added that the situation had potentially sensitive implications for U.S.-Israeli relations because the Israeli govern-ment was aware that U.S. policy forbids overseas sales of krytrons unless they are subjected to strict case-by-case review and licensed by the State Department.

If Israel is unwilling to permit such inspections, the United States in conventional equipment for re-wants Israeli officials to come up search and development and testwith an alternative means of accounting for an estimated 500 to 600 devices.

Washington has also called on Israel to return unused devices still in its possession, because they were never licensed for export, the

sources said. It became known this week that a rederal grand jury in Los Angeles was investigating whether the devices were smnggled out of the country in violation of U.S. law.

clators could be liable to a 20-year held a cocked rifle to his head." the national security advantage of a foreign country.

It has been widely assumed for years that Israel can make atomic weapons. U.S. officials have said. however, that Israeli secrecy prevents the United States from learning whether Israel has such weap-

Israel's refusal to submit to international controls and inspection has also meant that, despite its close ties to the United States, it is barred by U.S. nuclear proliferation rules from obtaining devices such as krytrons that could be used

in developing nuclear weapons.

The Israeli Defense Ministry, reacting Sunday to news of the grand pary investigation, admitted that it had obtained a number of krytrons between 1979 and 1983 and still had a large stockpile. The ministry said the devices had been used only ing and that none had been sent to other countries.

A Pakistani citizen, Nazim Alimed Vaid, was arrested in June in Houston on charges that he had tried to obtain 50 krytrons and smuggle them out of the country. The Pakistani government demed that his actions were connected to its reported atomic bomb program. Mr. Vaid, after being allowed to

Armed Men Kidnap a Top **UN Official** In Beirut

BEIRUT - Armed men kidnapped a senior United Nations official in Moslem West Beirut on Wednesday, bundling him into a car after smashing the windshield of his UN vehicle and holding a gun to his driver's head.

Aidan Walsh, 46, deputy direc-tor for the United Nations Relief and Works Agency, which assists Palestinian refugees in the Middle East, was seized on a seafront bou-levard while going to work, officials of the agency said.

Mr. Walsh, an Irishman, was the

second officer of the agency and the 12th foreigner abducted in Lebanon this year. He was the first person abducted since a wave of kidnappings in March.

There was no immediate indication of which group was responsi-

ble for the abduction.

An official of the UN agency said that two cars containing eight gunmen in green camouflage faigues blocked Mr. Walsh's car. Four men jumped out, pointed Kalashnikov rifles and pistols at Walsh and ordered him out of the

car," the official said.
The Palestinian driver tried to argue with them, saying Walsh was Irish and UNRWA was helping people in Lebanon," the official the Export Administration Act, vi- his windshield with a rifle butt and

Toll at 8 In Siege Of MOVE

Mayor Defends Action of Police In Philadelphia

PHILADELPHIA - The police

reported Wednesday that they had found eight bodies in the charted ruins of the house formerly occu-pied by the radical back-to-nature group MOVE.

The house was destroyed after the police bombed it in an attempt to gain entry, and about 60 neigh-boring dwellings also were burned. On Tuesday, Mayor W. Wilson Goode defended the decision by the police to drop a bomb on the house as appropriate, although the action "did not turn out as intended." The city's police commissioner said Wednesday that officials be-lieve the group had a hand in start-

ing the fire. All or parts of six charred bodies, two of them the remains of chil-dren, were removed Tuesday from the house Clarence Mosley, the city's assistant managing director, said that one of the two bodies found Wednesday also was that of

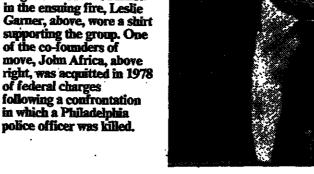

Some reports had said as many as 12 adults and 10 children had been barricaded in the house before the police tried to clear them out. Other reports said that MOVE members had dug a labyrinth of tunnels from the basement, and the police were looking for signs of escape routes.

Mr. Goode, who denounced MOVE as a group "dedicated to the destruction of our way of life," said at a press conference that he accepted responsibility for the "accidental and unexpected" fire. "But it was the right decision," he said.

He promised the estimated 225 neighborhood residents who were displaced by the fire that the city would pay to rebuild their houses. About 60 houses were destroyed,

Output **Declines** In U.S.

Drop Is First In Six Months, The Fed Says

The Associated Press

WASHINGTON - U.S. industrial production fell 0.2 percent in April, the first decline in six months, the Federal Reserve Board reported Wednesday.

The central bank said its index of the total output at U.S. factories, mines and utilities fell for the first time since a 0.4-percent drop in October. April's decline followed a 0.3-percent rise in March.

[As the report of a decline in output was being made public, Larry Speakes, the White House spokesman, sought to allay fears about savings and loans associations in Maryland, where two such institutions have been placed under a state-appointed overseer, United Press International reported from Washington.

["The federal system is safe and protected," Mr. Speakes said. We're monitoring the situation at the Treasury. It has been discussed at the White House, but these are state matters." Details, Page 13.]

Sales of manufactured goods rose a slight 0.4 percent in March, and inventories declined for the first time in two years, the govern-ment said Wednesday.

The Commerce Department said that sales totaled a seasonally adjusted \$420.2 billion during March after a 0.3-percent February in-

Total business inventories dropped 0.1 percent in March to \$578.2 billion. It was the first decline in inventories since a 0.6-percent drop in March, 1983.

The setback in production reflects the industrial sector's struggle to overcome the effect of America's worsening trade performance, where imports are outpacing U.S. exports by a record margin. Economists have also cited the trade deficit for limiting overall U.S. eco-

nomic growth so far this year. Analysts said the inventories decline reflected the general weakness in the overall economy and showed that businesses were trying to cut their stocks of unsold goods because of weak demand.

The Reagan administration and some economists said they viewed a 0.9-percent increase in retail sales last month as an encouraging signal (Continued on Page 2, Col. 7)

U.S. Progresses With Laser Weapon

By William J. Broad

New York Times Service NEW YORK — Scientists at the Lawrence Livermore National Laboratory in California have made what appears to be an impora nuclear bomb, U.S. scientists say.

The government scientists and others familiar with the top-secret research said Tuesday that the advance has increased the brightness and thus the power of the X-ray device by focusing its rays.

Mr. Walsh's kidnapping brought to 10 the total of foreigners still missing after abduction in Moslem-controlled regions of Lebanon Ronald Reagan, have been briefed on the advance.

Dr. Hans A. Bethe, the Nobel Collett, those held include five tist on the space defense project use of nonnuclear devices to descon after the briefing to say, The X-ray laser should not be disquali-example, these devices might hurl

Previously, Dr. Bethe has been publicly disparaging of the X-ray weapon, but it was not clear if the briefing was what changed his posi-

The X-ray laser has been under tant advance in developing an X- development for nearly five years ray laser space weapon powered by at the Livermore laboratory. It was a major catalyst in the start of the space defense plan, which Mr. Reagan calls the Strategic Defense Initiative and which is widely known as "star wars." The first-generation device was known as Excalibur, from the legend of King Arthur. The new device is known as Super Excalibur.

In recent months, Reagan administration officials have tended to play down the X-ray laser's importance in the five-year, \$26 billaureate physicist who has been a lion research project on space key critic, wrote to the chief scien-weapons, emphasizing instead the lem fundamentalist group, have fied simply because it exploits a nonexplosive projectiles to destroy claimed responsibility for most of nuclear explosion as a power targets through their speed and im-

day, the recent development at the Livermore laboratory is politically embarrassing in a sense, to the Reagan administration.

Increased brightness is crucial if the laser in the X-ray range of the spectrum is ever to be effective against satellites and missiles in space, according to both defenders and detractors of the device.

The nuclear X-ray laser takes the power of a nuclear explosion and channels it into laser rods that emit powerful bursts of radiation. Over long distances in space, these rays would tend to spread out, gradually reducing the destructive power of the weapon.

According to government scientists, a method of focusing the rays was tested in Nevada in an underground explosion. The test occurred March 23, the second anniversary of Mr. Reagan's speech proposing a space shield to render nuclear weapons "impotent and

According to the scientists, the key aspect of the advance is to use special optics to focus X-rays as they stream out of the nuclear explosion. Many critics had viewed the task as virtually impossible, since X-rays penetrate matter rath-

Soviet Raids in Pakistan Viewed as Bid to Deter **Aid for Afghan Rebels**

By Steven R. Weisman New York Times Service ISLAMABAD, Pakistan - The Soviet Union has stepped up air and artillery attacks inside Pakistan in recent months in what Pakistani officials say is an attempt to undermine support here for Af-

ghan rebels.

The officials said Monday that their latest figures showed a doubling in the rate of attacks by Soviet planes along the northwestern border. They said there had been 83 violations of Pakistani airspace since the beginning of the year, compared with 88 such violations in all of 1984.

The increased activity has stirred new concerns among American and Pakistani policy-makers that the attacks could generate resentment and fear among Pakistanis over the toll being taken by the fighting in Afghanistan. "The air incursions are impor-

tant," a U.S. official said, "because if they keep continuing, they could create a public perception that Pa-kistan is somehow helpless in the face of them. They have a bad psychological effect, and they give ammenition to the opponents of Paki-

Indeed, the attacks appear to have been a factor in what some call a growing tendency by critics of President Mohammad Zia ul-Haq to question the government's strong support of the Afghan rebels. Three million Afghans—onefifth of the population - have fled into Pakistan since 1979.

In interviews, Pakistani and American officials expressed full confidence that public support for the Afghan rebels would not diminish. They predicted, however, that there will be a debate over the wisdom of that support when the Pakistani National Assembly convenes next month.

Such a debate would be likely to

To End Frog Ban

The four-month ban on frog fiunting was to "give the frogs a chance to breed in safety," an official statement said.

Bangladesh exports the legs of 70 million frogs each year, officials said. If the frogs were left alive, they would eat more than 100 tons of insects, particularly mosquitoes, force General Zia's government for the first time to mount a vigorous defense of his policies and answer his critics in a public forum. A senior Pakistani official said

that after meeting in Moscow in March with the Soviet leader, Mikhail S. Gorbachev, General Zia concluded that the Russians were growing "impatient" with the stalemate in Afghanistan.

This official said that Mr. Gorbachev had told General Zia that the Soviet Union was highly concerned about Pakistan's support for the guerrillas. The official said that Soviet incursions into Pakistani airspace were thus seen as an attempt to "intimidate" Pakistan in what he called "a war of nerves."
For years, it has been widely

known that the United States has ioined with Arab countries and others to help provide covert assistance to the Afghan rebels, who are waging a fierce battle against more than 100,000 Soviet troops, who began entering Afghanistan in De-

The U.S. Senate voted unanimously Tuesday to provide \$15 occupation, The Associated Press reported from Washington, The vote marked the first time that the Senate had publicly designated funds for this purpose.)

The Soviet intervention prompted President Ronald Reason to provide Pakistan with a \$1.6-billion military aid package, including 40 F-16 jet fighters.

"Those planes are not meant for Pakistan to go out and find Soviet planes to attack in Afghanistan," a U.S. official said. "They are meant to prevent the Soviets from attacking the heart of Pakistan. That de-

Campaign Set For Tax Plan

(Continued from Page 1) York, and Senator Robert W. Kasten Jr., Republican of Wisconsin, authors of a major tax-simplifica-

tion proposal in Congress, have urged the White House to bring the top rate below 30 percent. Officials said this idea was discarded Tuesday because the revenue loss could not be easily offset elsewhere in the plan. Mr. Reagan has pledged that the plan will be revenue-neutral, meaning that it

will bring in approximately the

Hold on to your memories.

same revenues as existing tax laws. White House officials said they did not expect congressional advocates of tax simplification to embrace the new plan immediately. They said they hoped it would be seen as a "framework" for producing legislation in the next few

Egyptian and Israeli diplomats said the talks, held under heavy security in a hotel in Giza on the outskirts of the capital, would cover several issues.

The most crucial topic for Egypt is settling the status of Taba, a 250acre (100-hectare) beach tract over-looking the Gulf of Agaba at the southern end of the border between the two countries.

Israel retained control of Taba when its soldiers withdrew from the Sinai Peninsula in April 1982 under terms of a 1979 peace treaty. Egypt wants Taba's status settled by arbitration, but Israel wants to try mediation first.

A four-member U.S. team attalks. U.S. Embassy sources said the Americans were participating as observers only in talks concerning the border dispute and would not be on hand for other talks. Relations between Israel and Mubarak recalled his ambassador to protest the invasion and a massacre of Palestinian refugees by Lebanese Christian militias who supported Israel.

Meanwhile, riot police used truncheous to rout hundreds of protesters outside Cairo's main synagogue. The protest appeared related to reports that a ceremony commemorating the 1948 founding denied that a ceremony was experiments on prisoners.

Italian Communists Set Back in Cities

WORLD BRIEFS

House.

her ze

ROME (UPI) — Communists are expected to be shut out of office in all but two of Italy's nine biggest cities as a result of defeats in local elections last weekend, political commentators said Wednesday.

Bologna and Florence are the only cities among the nine where the Communists have the strength to take control of the city councils in alliance with other leftist parties. The Communists, Italy's second-lanes General Stroessner's visit to West Germany offered the best chance

party, formerly controlled six of the nine cities.

In the remaining seven cities — Rome, Milan, Turin, Genoa, Venice, Bari and Palermo — the five parties that form the coalition headed by Prime Minister Bettino Craxi, a Socialist, have won enough seats to form majority city councils. Five-party administrations also are expected to take over in scores of smaller cities.

Data Released on Korean 747 Flight

General Stroessner wanted to de-liver Dr. Mengele, his secret police could do so quickly. TOKYO (AP) -- The pilot of the Korean Air Lines airliner shot down by a Soviet fighter in September 1983 misled Tokyo air control about his altitude during the last minutes before the attack that killed the 269 persons aboard, according to data released Wednesday by the Japanese Mr. Wiesenthal said that Chancellor Kohl, in a letter dated March 8, said he intended to "raise emphatically" the issue of Dr. Men-

In a news conference, Yutaka Hata, a member of the upper house of the Diet from the ruling Liberal Democratic Party, said the data revealed that the pilot of the Boeing 747 had taken command and was not relying solely on an automatic pilot system during the last minutes.

The new document was issued in the name of Prime Minister Yasuhim

Paraguay, the chancellor contin-Nakasone and was delivered in reply to a formal query submitted by Mr. Hata last month. However, a research group led by Mr. Hata and Hideyuki Seya, a Socialist member of the upper house, did not offer possible reasons why the pilot would have given wrong information to air ned, West German pressure would be more effective if Mr. Wiesenthal were to supply particulars to sub-stantiate his belief that Dr. Men-

Swedish Teachers' Strike Is Ended

STOCKHOLM (Renters) — The main public employees' union in Sweden called off a 13-day strike by teachers on Wednesday but said that work stoppages by other civil servants would continue until wage de-

Lars Backlin of the TCO-S union said the strike by some 6,000 teachers would end at midnight Wednesday to relieve pressure on students and their parents. "We believe the teachers' strike has made its point," he said. About 23,000 teachers still will be affected by a lockout imposed last weekend, unless employers respond to the union gesture and allow

schools to reopen.

The union's chief negotiator, Rune Larsson, said the union was easer to get negotiations started again. Swedish companies said Wednesday they would face serious problems if the strike, which has reduced the country's foreign trade to a trickle, was not settled soon. About 70,000 public-sector posts have been unmanned because of the strike and retaliatory locken, which have halted air traffic and closed customs offices at all but a few

China Paroles Lawyer Jailed as Spy

BELIING (AP) - China said Wednesday it had paroled a Hong Kongborn, Harvard-trained lawyer jailed for spying two years ago is a case that focused attention on arbitrary arrests and secret detentions in the Chinese justice system.

The news agency Xinhua said that parole for Hanson Huang, 34, was based on his "prison behavior and willingness to serve Chinese modernization." Mr. Huang, who once worked for a U.S. law firm, disappeared in January 1982 during a visit to Beijing. The government did not acknowledge until February 1985 that he had been arrested, tried as a spy and sentenced to 15 years at an undisclosed prison.

The announcement said Mr. Huang was paroled by an unidentified judge of the Beijing Intermediate People's Court. It did not disclose Mr. Huang's present whereabouts or explain whether he would be allowed to leave the country. The newspaper did not identify

For the Record

In the city of Anuradhapura, Sri Lanka, 10 Tamils were killed and 11 homes set on fire in reprisals against an attack by Tamil separating guerrillas, police in Colombo said Wednesday. The death toll in the original attack on Tuesday rose to 145, they said. They also reported attacks on Tamil property at Puttalam on the west coast and Tissanaharama in the south Deputy Prime Minister Li Peng of China left Beijing for East Germany,

Poland and Hungary on Wednesday. He is the highest-ranking Chinese official to visit the three East European countries in 20 years. (Renters) The death toll from Legionnaires' desease in Stafford, England, rose to 37 on Wednesday, officials said. Six murses contracted the disease but have recovered and returned to work. The disease is not contagious. was deported. Sources familiar with the Los Angeles investigation said it centered on an Israeli businessman, Arnon Milchan, who allegedly worked with a Los Angeles company, Milco International, to obtain the krytrons from their American manufacturer, EG&G Inc., a hightechnology company in Wellesley, Massachusetts, and transfer them to Israel.

Jack Donohue, an attorney for EG&G, said Tuesday that "we sold a number of these items" to Milco and that "as far as we knew, the purchaser indicated they were for domestic use and there was no in-tention to export them."

One source said, however, that "it's clear on the face of things that the Israeli Defense Ministry knew that it was receiving restricted goods without having followed the prescribed rules."

"What remains to be seen," the source said, "is whether the administration or Congress will make a major issue out of this incident when it's dealing with Israeh aid or whether the matter will be softpedaled in exchange for an Israeli ect of contrition.

Israel is the largest recipient of U.S. foreign aid. The administration has proposed aid levels for fiscal 1986 of \$1.8 billion in military assistance and \$1.2 billion in economic assistance of \$1.5 billion to be spread over two years.

U.S. Candidates Spent Record in '84 Elections

The Associated Press WASHINGTON — Candidates spent a record \$374 million on last year's congressional races, up 9.3 percent from the 1982 elections, the Federal Election Commission reported Wednesday.

In the previous two congressional elections, spending climbed at rates of 43 percent in 1980 and 23

(Continued from Page 1) or than being reflected, bent or focused by it.

However, in testimony last Au-

gust before the House Republican Study Committee, Dr. Robert Jastrow, a physicist at Dartmouth University who is a proponent of the space-based missile system, said that ways would be found to focus radiation. The X-ray laser, he said, "is one of the most promising possibilities for a defense against Soviet missiles."

Scientists familiar with the recent underground test say that the results, while generally positive, were in some cases ambiguous. "It was a very good experiment."

said one scientist, who requested anonymity. "Some parts worked well. Some didn't, But nothing was so good for Teller to be so emphoric." He referred to Edward Teller, a physicist at Livermore who played a central role in developing the hy-drogen bomb and has vigorously promoted development of the nu-

"To turn it into a weapon system would take maybe a dozen other tests," the scientist added.

Trying to interpret the results of underground nuclear tests is complex. Analysis and debate often continue for months after.

In an interview, Dr. Bethe referred to Mr. Reagan's plan, saying: "I still feel that SDI as a whole is nonsense, but within it one should not discriminate against the X-ray laser. You should not rule out any specific technology for political reasons."

Although weapons experts in the national laboratories are eager to pursue X-ray laser research, some military officials in the Pentagon see substantial difficulties. The problems include treaties barring predeployment of the weapons in space, special time constraints on trying to get them quickly into space during a Soviet attack, and the damage that exploding nuclear weapons would inflict on nearby

strait-jacket."

Press International reported.]
President Ronald Reagan has

said he backs the Senate's plan and will give no more ground on military spending.
Some members of the budget

committee, speaking before their final vote on the plan, said addi-tional savings in military spending would be used to protect domestic programs Mr. Reagan had pro-posed eliminating. They include mass-transit subsidies, the Amtrak rail system, Urban Development Action Grants and the Small Business Administration

But these programs still would be reduced substantially by the Democrats. For instance, they would cut grants for urban devel-opment by about 10 percent and

Education funding would get a small increase, and such programs targeted at the poor as Medicaid and food subsidies would receive enough funds to cover inflation.

Mr. Gray said that, in addition to protecting senior citizens by refusing to freeze cost-of-living adjustments for Social Security and other retirement plans, the budget committee Democrats had rejected the "tremendous" cuts in Medicare approved by the Senate.

The Senate voted to reduce fund-

William H. Gray 3d

■ Weinberger Makes Proposal Defense Secretary Caspar W. day that Congress reduce inflation and other contingency accounts in the Pentagon budget rather than cut weapons programs, The Washington Post reported.

He listed \$4 billion in cuts from

the fiscal 1985 budget that could be credited to fiscal 1986 to avoid cutting into military programs. This would "reduce the likelihood" that the Pentagon would have to cometo Congress later this year to request supplemental funds for fiscal 1986, he said.

Mr. Weinberger's recommendations came after he bad studied the impact of the Senate's action on military spending, the Pentagon said in a press release. It said he concluded "that the new budget levels cannot be accommodated without seriously impacting the de-

fense program."
Under Mr. Weinberger offer,
\$1.6 billion would come from the surplus in this year's account to cover inflation; \$1.5 billion from money that has been set aside but not obligated to contractors, with \$1 billion of that amount in procurement and most of the remainder in research; and \$900 million in cash kept in various funds to pay

> petitive.
> United is healthy financially. It led the industry in revenue last year at \$6.2 billion and operating profit of \$564 million. Inexorably, as American Air hires more beginners at cheaper wages, its costs will go

down compared with United's.
The company's No. 1 objective is to obtain a cost-competitive con-tract without a strike," said a Unit-ed spokesman, Chuck Novak. He said the average United pilot, including captains, first officers and second officers, was paid \$91,200 a

year for 81 hours of flying a month. United has completed negotiations with two unions, the Associa-tion of Flight Attendants and the International Association of Magotiated in both cases.

There are reasons for using new weapons other than the simple fact that they are available or because

The Associated Pres

SEOUL - About 125 student demonstrators have been detained by the police after anti-government protests, sources said. The police' and other authorities, following counted ballot were not expected usual practice, declined comment on the incidents.

Several hundred students shout-

ed slogans near the Seoul railroad ince and, equally important, is station late Tuesday, then broke promising to take whatever seats it into small groups, witnesses said, wins and participate actively in Demonstrators hurling stones, flaming torches and gasoline Candidates from Sinn Fein contested 91 of the 566 seats up for police, who fired tear gas in attempts to control the protesters.

• In New Jersey, the 1981 slaving of a state trooper, Philip La-monaco, in a gum battle led the department to replace 2,500 .357-caliber Smith & Wesson six-shoot ers with 9mm semiautomatic wear ons made by Heckler and Koch The new weapons carry nine bul-lets and reload three times as quickly as the old ones, according to Captain Joseph Kobus, a

spokesman for the department. In Chicago, the Hostage, Barricade and Terrorist Incident Team was having a tough time maneuver-ing with their 12-gauge shotguns and 30-06 rifles, said John Gavin, an officer in the Uniform Equip

ment Standards section. "We looked for an intermediate assault weapon for going up small stairways in crowded apartment houses," he said. They chose a .223caliber rifle with a collapsible stock.

 In New York, where police killed an emotionally disturbed woman in an eviction proceeding last year, the search is on for nonlethal weapons. The Emergency Services squad has purchased several stun gans called tasers and is experimenting with a type that attaches to poles, said Inspector Ray mond Abruzzi, commanding officer of the squad.

Tasers shoot electrically charged darts that cause a loss of muscle control. Stun guns are similar in effect, but the pocket-size weapons most touch a person directly.

Five police officers have been indicted in New York on charges of using stun guns to torture suspects but stun guns were not issued to them from the department. They were not members of Inspector Abruzzi's smad.

U.S. Conducting **Simulated Raids** On Its Embassies

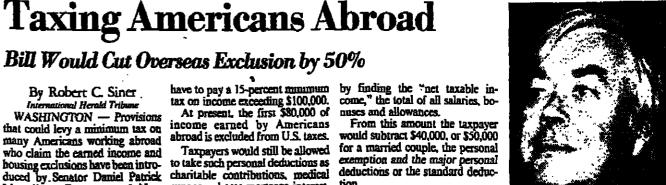

The Associated Press

WASHINGTON — The Reagan administration is conducting simu-lated terrorist attacks on the most vulnerable U.S. embassies to test their ability to handle future crises, a State Department official realed Wednesday. Robert B. Oakley, director of the

Office for Counter-Terrorism, said the program was similar to military exercises that test the ability of U.S. forces to respond to emergen-

"A visiting team simulates a hijacking, a bombing or an assault on the embassy," Mr. Oakley said in testimony prepared for a Senate hearing. Carry On With SALT-2

In kinder times, there would be no question but that the United States would decide without much fuss to keep in force the terms of an old, admittedly imperfect arms control agreement while working on a new and supposedly better one. For the Reagan administration, however, it is a tough question whether to continue respecting the never ratified SALT-2 treaty, which the president at first pronounced "fatally flawed" but later reluctantly agreed not to undercut so long as Moscow did not undercut it either. The date at which the treaty would have expired is coming up, and even sooner the United States must decide whether to retire some old missiles in order to make room for new ones under the SALT-2 lid.

Within the administration a range of opinion is evident. Important figures on the politi-cal side continue to regard SALT-2 as a symbol of the failure of past arms control accords to do more to strengthen American security and as a damaging restraint on American arms-building programs. That the Soviets say they can still live with SALT-2 is taken as evidence that the restraints are not tough enough. It is suggested that breaking out of SALT-2, far from complicating the Geneva talks, would give Moscow added incentive to consider the proposals Washington is making there. Anyway, why should the United States honor an agreement when many questions about Soviet compliance are still hanging?

Elsewhere in the administration, including on its military side, there is another emphasis. There is, for instance, a disposition to believe that the Soviets are considerably better placed to deploy threatening new weapons than is the United States without SALT-2. To understand why, you need merely look at the bedraggled history of the MX. Military officials can ideatify no good military reason to go past the SALT limits. Diplomats worry how American allies would react to the spectacle of an American breakout. Many observers feel that Congress would react sharply to that spectacle by taking new budget hostages. The best cure for the flaws in past restraints and verification standards, many of these officials feel, is progress in Geneva — something arguably more likely to come in an atmosphere undisturbed by the detonation of SALT-2.

Liberal arms controllers argue that the very process of arms control is as important as the product — the agreements, which so far have turned out to be pretty thin. At this late date, however, no one can really think that President Reagan is going to change spots and adopt this sort of questionable reasoning.

Nor is it necessary for him to do so. In his own administration, among people devoted to his conservative principles, there is comfortable support for continuing to observe the terms of SALT-2. He should do it.

Helms vs. Birth Control

continuing their fight to dismantle U.S. aid for tries. Senator Helms has attached a crippling amendment to the foreign aid bill now being considered on the Senate floor and may try to add even more destructive language.

Ostensibly the Helms amendment is intended only to prevent U.S. money from being used for coerced abortion and infanticide in China — alarming reports of such practices have been widely circulated — and this is an objective with which no one would quarrel. But the fact is that, under current law, no U.S. money now supports such activities either directly or indirectly. The Helms amendment is thus unneeded for its stated objective.

It is also dangerous. It would prevent any U.S. money from being used, either directly or indirectly, in any country that "permits, officially or in practice, infanticide or coerced abortion," or by any organization that gives any kind of direct or indirect aid to such country. Senator Helms states in a draft report that the language is deliberately "very broad" so that aid may be cut off not only to China but also to any other country in which the forbidden practices might be suspected, even if they were without official sanction.

Since infanticide is a tragic occurrence in nearly every country of the world, including

Senator Jesse Helms and his supporters are the United States, a rigorous application of the amendment obviously could serve to terminate birth control programs in developing coun- all birth control aid. The most direct casualty of this amendment would be U.S. assistance to the useful and well-accepted United Nations birth control programs. The United Nations includes China among its aid recipients. However, contrary to recently published allegations, UN money is narrowly confined to stated purposes and no UN money has ever been used for abortion, whether voluntary or coerced, much less for infanticide.

Senators who are rightly concerned that U.S. money not be misused do not have to rely on birth control advocacy groups for this assurance. The Reagan administration's own Agency for International Development has repeatedly investigated UN programs and reaffirmed that they conform to long-standing U.S. policy against aiding even voluntary abortions. The most recent report, issued only two months ago, once again gave the United Nations a clean bill of health. Of course, the United States should use all its moral suasion to press for stronger action by the Chinese government against coercive practices. But senators should remember that voluntary family planning programs are the best-proven and most humane way to reduce resort to the ageold practices of abortion and infanticide.

Private Bank Insurance

Only a few weeks ago Ohio's privately insured savings and loan associations buckled under a wave of scandal and depositor panic. Now Maryland's privately insured thrift institutions are under severe strain due to large withdrawals of deposits. Two of these instituof the insurance fund but others are in jeopardy and looking for federal help.

Nothing that has happened in Ohio or Maryland puts federally insured bank deposits at risk. But the federal government's concern is certainly justified. The two crises suggest that private insurance offers inadequate protection to depositors and poses a threat to

America's national banking system.

Congress should insist that privately insured thrifts switch to federal insurance or, if they cannot qualify, close up shop.

In Maryland — and also in Massachusetts. Pennsylvania, North Carolina and Ohio state-chartered savings and loans have been able to avoid tighter federal regulation of lending and higher federal insurance premiums by joining private insurance pools. When two such Maryland thrifts were about to default on

obligations last week, the insurer stepped in. The Maryland Savings Share Insurance Corporation could probably have covered the losses of the two, but if others also get into deeper trouble the fund might run short. If that should happen, the Maryland Legislature would have to decide whether to make good on the insurance fund's unpaid debts or leave depositors to lose some of their money. Surely

the state bears some responsibility to depositors who had reason to believe that state regulators would protect them.

That is not, however, the end of the matter, as uneasiness in North Carolina shows. The line between a state's private insurance system tions have been taken over by the conservators and federally insured systems elsewhere is not

a reliable barrier against losses of confidence. When Ohio's private system went belly up, depositors in nearby federally insured Ohio banks were sophisticated enough to understand that their money remained safe. But the Ohio crisis triggered an abrupt decline in the value of the dollar overseas. How foreigners or Americans - would react to more bad news from Maryland is not known. But a world financial system already buffeted by explosive movements of capital would surely be better

off if it avoided gratuitous strains. The prudent course would be for Congress to set a timetable for ending all private deposit insurance systems. Even federal insurance is no panacea. Many federally insured savings and loan institutions are in weak financial condition — and getting weaker. Regulatory reforms to prevent their managers from betting the store on speculative loans and in-

vestments are overdue. But federally insured thrifts, however serious their problems, at least have the benefit of Congress's determination - and capacity to guarantee their deposits. That cannot be said for deposits in the still privately insured offshoots of the thrift industry.

cannot afford the luxury of being a pure artist, he must simultaneously be a teacher to the illiterate and a lawyer for the downtrodden." Whatever the merits of this argument in the poor countries - where it would seem to enjoin all privileged persons, not artists alone - it has an extreme power of attraction for artists and intellectuals in the rich countries.

The call to activism appeals to the idealism of intellectuals, but also seems to offer a solution to their sense of alienation - of isolation from the real forces at work in the world,
A Polish poet and essayist, Stanislaw Bar-

anczak, said recently that the close collabora-tion of Polish intellectuals and artists with workers in the Solidarity movement since 1980 has provided, for them, "a unique moment."

One might parenthetically observe that Marxism thus at last delivers on its promise to cure the alienation of intellectuals: It has forced them into a selfless civic cooperation to resist the political regime inspired by Marxism.

college in Saratoga Springs, New York, to observe the 20th anniversary of the American quarterly Salmagundi, Mr. Baranczak made a second observation that significantly modifies the first. What has happened in Poland since 1980, he said, has enabled Polish intellectuals to atone for their conduct before and just after World War II. A great many of them had ter World War II. A great many of them had then been eathersiasts for Marxism and apolo-gists for the Communists. They contributed more than their share to the tyranny imposed on the Poles as the Communists were consoli-

dating their power after 1945.

He also said that despite the intensity and value of the work he did with Solidarity, it was a relief finally to return to his own proper work,

trying to shift the blame to others. But there are

constants that run back from the Beirut inci-

P ARIS—The Mexican writer Carlos Fuenties has said that a writer in his country observation, lost in too much of the discussion that writers and professors have among themselves about commitment, political engagement and their role in the public world.

They in fact possess no special political qualifications. When the intellectual takes up a political role, he does so on the politician's terms, not his own. A political party or movement may be able to use him as propagandist, analyst or tactician but it cannot use him as poet, scholar or novelist without subverting the art or scholarship. There is dreary evidence of

The argument has been made that Marxism itself is really the means by which the intellectual revolutionary puts down his rival, the working-class rebel.

this in all the "committed" but largely worth-less literature produced on party lines by Com-munists and Fagists since the 1920s.

Even the people who more recently have turned themselves into propagandists for liberal (or neo-conservative) governments — whether under the auspices of government agencies or of committees for present and future dan-gers, and the like — have all paid some cost in damage to their real work. It can be reason-ably asked if anything has been gained in pro-portion to what was lost. Propaganda converts first the propagandist, and he or she is sometimes the principal convert.

Those who become advisers to presidents more often than not find themselves turned into omaments or instruments. It was flattering to John Kennedy to have Arthur Schlesinger Jr as court historian, but Professor Schlesinger's advice on such matters as whether or not to invade Cuba was ignored. Henry Kissinger, by career a political analyst, nonetheless did what Richard Nixon decided. One may reasonably dent through the mining of Nicaraguan harbors to many previous episodes. They provide a set of the givens, the normal ingredients that have ask if much would have been changed had either stayed at Harvard.

The artist or scholar is too often drawn to political action because he lacks confidence in the authority of his trade. He is looking for a cure to his sense of exclusion, obscurity, frustration. When the intellectual says "I must give #6" myself to the people" he is often saying, "I want the people (or the revolution, the government) to give themselves to me, to be led (or advised) by me, giving me the eminence and power my work has failed to provide."

The argument has been made that Marxism itself is really the means by which the intellectual revolutionary purs down his rival for power, the working class rebel. Marxism says that revolution is a science. You have to be an educated person to understand it, so as to be able to tell the workers what to do.

fedi funter trial

Power and fame are the spurs, more often than altruism — which is exactly the same as for the politician himself, except that he is more likely to know what he is doing, and what he cannot do, in his hard trade. Intellectuals like to apply abstractions to living society, with the occasional unfortunate consequence such as the Guiag. Pol Pot's killing fields, the camps, the famines produced by improving agricultural techniques in backward societies.
In the end, nonetheless, the politician is near-

ty always applying someone eise's ideas — the important slave, as Keynes said, of some longdead economist or philosopher. The intellectual wins in the end. There is no joy in this for the economist or philosopher, who would have pre-ferred the Nobel Prize and rich consultancies The cobbler to his last.

The CIA in Beirut: Less Than Extreme Caution

WASHINGTON — The latest front-page appearance of the CIA provides one more piece of irrefutable evidence that the United States should engage in ambitious co-vert operations only with the utmost caution.

Even if the agency were absolutely first-class in such matters, which it is not, the nature of American society makes exposure of failure practically certain. When that occurs, American agents become subject to retaliation and a precious resource of national security, the vhole intelligence community, gets a black eye.

Terrorism in Lebanon provides the background to the most recent fiasco. As that country began to disintegrate in factional warfare last year, Americans on the spot became increasingly subject to violent incidents, ranging from threats through kidnapping to car bomb attacks on the U.S. Embassy and the marine headquarters in Beirut. Several top officials including Secretary of State George Shultz, CIA Director William Casey and National Security Adviser Robert McFarlane — came to the conclusion the United States should develop, if only to protect its agents, a covert capacity to penetrate and pre-empt action by anti-American terrorist organizations.

At the end of 1984 Mr. Reagan signed the order authorizing such action. His decision wascleared with the chairmen and vice chairmen of the House and Senate intelligence committees. With those mandates, the CIA began to develop a covert counterintelligence capability in cooperation with the intelligence arm of the government of President Amin Gemayel. But the Lebanese regime is more a faction among factions than a central government.

After receiving American training in counterterrorism. Lebanese inte into business for themselves. On March 8 they tried to wipe out Mohammed Hussein Fadlal-

lah, the leader of an extremist Shiite group thought to be responsible for terrorist attacks against Americans in Lebanon.

A powerful bomb was exploded near his home in the outskirts of Beirut. Some 80 people were killed by the explosion, but not Mr. Fadlallah. The story of that fiasco leaked. An account was published in The Washington Post of

It is naive to the point of criminal stupidity to suppose that large-scale operations can long be kept secret if they fail.

May 12. Even before the story was out, various

parties began running for cover.

Some officials in the CIA claimed they had always insisted that the operation be limited to fact-gathering, because anti-terrorist opera-tions were too dangerous. The CIA itself put out a statement saying it had "no foreknow-ledge of the bombing incident." The agency disclaimed "any training of Lebanese security forces" involved in the March 8 incident.

Other intelligence operatives blamed Congress for leaking the story, and the press for publishing it. They asserted that vengeance would now be wreaked on American agents in Lebanon. Patrick Leaby of Vermont, the new Democratic vice chairman of the Senate Intelligence Committee, indicated that he wanted to -- as ii de were not bound by the actions of the previous vice chairman. Second-guessing failure is nearly as odious as

Who remembers the eight marryred ham-

ROBERT GREENGARD.

to be considered in planning any covert opera-tions — the material for first-guessing. For one thing, America is an open society. Government agencies constantly bicker with one another, taking their complaints to Con-gress and to the press and television. It is naive to the point of criminal stupidity to suppose

that large-scale operations, if they do not suc-ceed, can long be kept secret. Failure will out. Second, working with foreign agents is par-ticularly tricky. They have their own agendas. They usually have scores to settle with various parties in their own country. Some of their targets are not necessarily the targets of Ameri-

can foreign policy. Foreigners working in the terrorist field especially tend to be flaky, and they are therefore doubly unreliable.

Third, the cost of publicized failure runs high. The intelligence community comes back into the public pillory. U.S. agents abroad become subject to retaliation. A major asset of foreign policy is weakened, if not paralyzed.

Extreme cantion should be exercised before engaging in covert operations. But the Reagan administration has thrown caution to the winds. Except for the oversight committees of Congress, it has practically wiped out institu-tional checks on dubious intelligence business. It has converted the president's Foreign Intelligence Advisory Board into a haven for rightwingers. And it has maintained at the helm of Central Intelligence a figure who combines in-sensitivity to ethical questions with a gung-ho of the most extensive kind - William Casey.

The average German dislikes President Reagan and could not care less what graves he walks past. Amid all this anti-German sentiment we may wonder why Germany should stay in an alliance that makes it an unprotect-ed forward position full of weapons controlled by Americans from the safety of SDI-America. If it is still "Woe to the vanquished" after 40 years, then here's to neutralism!

OLAF RAABE Braunschweig, West Germany.

Americans hated Hitler and a few of his crazy henchmen. The ordinary German soldier — and we had quite a few as prisoners of war working on our farms in the South and Midwest —was thought to be a clean fighter. DOOLEY GILCHRIST. San Antonio, Texas,

Allied air raids turned the big cities of Germany into the blazing funeral pyres of more than 800,000 children, women and old men. The Germans are assumed of the crimes of a mad dictator, but many Americans still justify those harrowing atrocities. Ronald Reagan and Margaret Thatcher should commemorate those victims of madness, too.

HERBERT A. KAMP. Saarbrücken, West Germany.

What Sort of Peace Is This?

MARY TROYCHAK-WALLULIS Murthardt, West Germany.

President Reagan's "I am" sequence at Bitburg was very one-sided. "Never again" does not mean it can't happen again. It is happening in various places in the world today, and not only with Communist inspiration. What about all those oppressive regimes the U.S. government maintains? Further, what sort of peace is there to celebrate after 40 years in a world where both the United States and the Soviet Union continue an arms race that threatens it with total destruction?

While the Bitburg controversy raged, I read that the Canadian writer Farley Mowat had been barred from entering the United States, apparently because he wrote a book portraying the Soviets in a friendly light. As a Causdian I am beginning to wonder just what sort of values prevail south of our border.

Flora Lewis, in "Bitburg, 1985; The Damage Is Done, a Lesson Remains" (April 27) cited Ryszard Kapuscinksi's reference to history as a river consisting of deep and permanent currents and of surface flows that appear and disappear. But she does not convincingly

> In the first official reaction to the papal visit by the Dutch episcopal authorities Tuesday night, Hans van Munster, general-secretary of the national conference of bishops said in Utrecht that John Paul had pointed to defects without suggesting remedies

The pope is to travel Thursday night to Belgium, where police leave has been canceled following a wave of bomb scares and other threats to security, on the final stage of his tour of the Benelux

bourg's airport Wednesday. Grand Duke Jean is at right. **Spanish Officials Admit** Spying on Opposition By Edward Schumacher

ope John Paul II read an address on arriving at Luxem-

New York Times Service
MADRID — Spanish officials
have acknowledged that a government intelligence agency has infiltrated opposition political parties.

Deputy Prime Minister Alfonso Guerra said Tuesday that the government would conduct a thorough investigation of the spying.

The political espionage, first re-ported Sunday in El Pais, a leading daily newspaper, has angered op-position parties. The conservative opposition, the Popular Alliance, filed a lawsuit Tuesday demanding a court investigation. The group said that some of its confidential

papers were taken. Interior Ministry officials in the Socialist government of Prime Minister Felipe González said that they had moved to curtail the political spying since they uncovered it in 1983. But the officials said that some of the espionage continues.

Mr. González, who is attending a disarmament conference in Sweden, has made no comment on the

Alberto Elias, head of the intelligence agency, the Interior Brigade, said that the agency has concen-

tremist, nonparliamentary parties, although he acknowledged that it had collected information on the Popular Alliance as well. Mr. Elias said that most of the

information on the alliance had been filed away "because it did not have any value" and that "very little" had been passed on to the Socialist political appointees who run the Interior Ministry.

Manuel Fraga, president of the alliance, retorted, "It is very difficult to accept that the documents taken from here were not used." Among the documents that El País said had been taken were re-

ports by private consultants on ways to combat the Socialist government and confidential position papers that Interior Ministry offi-cials acknowledged had shown up in the ministry before they were presented to the Spanish parlia-Although Mr. Fraga calls the

case a Spanish "Watergate," he has stopped short of accusing Mr. González or other senior officials running the spy campaign. In part the case appears to exemplify the holdover independence of

the intelligence agencies formed under Franco. Of the eight agencies, some have

been accused in the press of being behind assassinations of Basque separatist leaders and others of collecting information on officials and members of parliament

Fr. Live

By Jane Leavy
Washington Post Service
AST LANSING, Michigan —
Her name is Blanche. She lies in bed, as she has since the fall of 1978. She waits for her husband who has not come in two years, for her children who sometimes visit on holidays, for someone to change the television channel.

Today she waits for Martin King, the inventor of a computer-ized eye-monitoring system that gives voice to people who have no other way to speak.

Mr. King lives a life of chips and diodes, input and output, modems and programs. He is exhilarated by high-speed CMOS integrated cirauits, enthralled by EPROMs. He is the new American hero: the com-

"Invention is not how to do something but the perception of need," he said. Blanche's need is clear. Six and a half years ago she entered a hospital for minor back surgery and left a quadriplegic. She can feel but she cannot move, except to nod. She can smile but can-

ter) card crayoned in primary colors, with the letters of the alphabet aligned under the numerals 1 through 5. Mr. King reads the numbers and letters aloud. Blanche nods when he reaches the right one. "One, two, three, four, five," he

says. "One, two, three, four, five." Blanche nods at a four, then an L, then a T and an H, until slowly, inexorably, she says, "I think of old men being inventors."

Mr. King, who is 35, kneels by her side, holding her hand. He is tall, about 6 foot 4. Kneeling, he can look into her eyes, which is not so much a nicety as a necessity. Blanche says people who know her can read her eyes. Mr. King's device, the Eyescan Communicator, can read her eyes and translate their position into written speech.

Blanche has been testing the device for Mr. King since December. The first time they used it, she broke her glasses. Today they will

Birth of Solar System Called Battle of Planets

By Walter Sullivan

HE inner planets of the solar munication device and that he system appear to have been needed more money than just life formed in a planetary Armageddon in which contenders for ultimate survival, some of them three times larger than Mars, repeatedly collidsurvived in each of the present planetary orbits, according to a newly published analysis.

Dr. George W. Wetherill believes the planets had "lots of brothers brating and the cosmetic problem those of today, which collided to form "trial" planets. "The four we would have been in order the said. Eventually, Mr. King said, the user should be able to memorial."

Age determinations on cocks indicate that the last content of the series of today. and sisters," not much smaller than

One of the final collisions, he said, probably increased the spin of Earth sufficiently to throw off ma-terial that then consolidated to form the moon.

Hearth sufficiently to throw off ma-tion years ago. By then, however, the bodies were "quite small," Dr. Wetherill said — about 30 miles in

Dr. Wetherill, director of the department of terrestrial magnetism at the Carnegie Institution of Washington, published his findings in the journal Science. His hypothesis is derived from a computer simulation of what probably happened after the solar system began to take shape from a rotating cloud of dust and gas about 4.5 billion

WASHINGTON (NYT) - Paleontologists have reported finding a fossil bed in Wisconsin that contains the remains of what appears to be the oldest known leech, among many other soft-bodied creatures — The analysis took into consideration various factors affecting the formation process once about 500 animals that are not usually preserved as rock fossils.

In the journal Science, Donald K. Mikulic of the Illinois State Geologibodies, each one-third the size of the moon, had formed in the region resulted from a "unique depositional environment" that preserved the around the sun now occupied by Mercury, Venus, Earth and Mars.

Among those factors were the The investigators believe the leech was probably predatory rather than gravitational fields around each parasitic. Another find in the fossil bed was a hitherto unknown crustaobject, the frequency of near-hits zan with compound eyes, like those of a fly, adjacent to pincers that may that would throw the objects into eccentric orbits, and the collisions that might have canceled the eccen-

TUCSON, Arizona (AP) - Arches and loops of luminous gas that rise Collisions would have generated for above the sun's surface after a major solar flare may represent a kind of healing of the sun's magnetic field, the Solar Physics Division of the American Astronomical Society has been told.

Dr. R. N. Smartt of the National Optical Astronomy Observatories said the loops marked a recovery from a disruption in the magnetic field caused by the flare. He said the loops could define a healing process that occurs over many hours, during which strands of the magnetic field reconnect gradually. The loops then fade and disappear after the magnetic field has reformed be said. enough heat within Earth to melt most, if not all, of its interior. Such melting would have occurred throughout the bombardment. allowing heavy material to sink and form Earth's metallic core.

The calculations assumed that not enough gas was present to affect motions of the objects as they sped past one another. The inner solar system, many scientists believe, was swept clear of gas by a violent "wind" from the sun.

Furthermore, each collision would have driven off most of any planetary atmosphere that had begun to accumulate. Since the impact histories of Earth and Venus were different, this could account for the differences in their atmospheric abundances of inert gases

such as argon. Initially, material destined to tors from the Mayo Clinic in Roch-

perfectly kept human time to the

The standard for clock time is the resonant frequency of the cesi-

atomic clocks at the U.S. Naval
Observatory in Washington and at
the National Bureau of Standards

The official time represents the
average of many cesium-beam
atomic clocks. The system, says the naval observatory, is accurate to within a billionth of a second per day - "a time-measurement precision equivalent to measuring the distance to the sun to within less than one-tenth of an inch."

But humans, whose timekeeping predates atomic clocks, like to watch the sun and the stars to set their clocks. When a given heavenly body is at the same place tomorrow as it was today, that's one revolu-tion, one day. And Earth cannot be counted on like cesium atoms. Sometimes it speeds up. Mostly it slows down.

The rotation is uniform only to within one-thousandth of a second per day. In the observatory's analogy, that is equivalent to measuring the sun's distance to within about a mile: or 1.6 kilometers.

To get the atomic and solar time standards together, a "leap second" is slipped in every so often. It was done twice in 1972 and has been done once every year since except for 1980 and 1984. The extra second inserted between the end of June and the beginning of July will be the 13th in the series.

Summer suits: unbelievable lightness!

Less than 700 grams (22.4 oz.): that's the total weight of an incredible high-summer suit offered by Lanvin.

The secret of this exceptional lightness is that it is made of terital twill woven on authentic silk looms. Another advantage of this fabric is that it does not crease.

It makes an ideal suit for travelling, as it washes just like a shirt; by hand or in a machine, it dries in three hours, and it needs no ironing.

It comes in navy, beige, petrol blue, brown or putty, either in town suit cut or with bush jacket. You can also buy the pants separately.

Economic Squeeze Quickens Pace of Mergers in Banking

By Stephen Timewell.

LONDON -- Early last year talk of mergers and takeovers dominated banking circles in the United Arab Emirates following the collapse of Union Bank of the Middle East. With oil revenues at little more than half the 1980 peak of \$13.6 billion the economy of the federation has changed significantly but the banking sector, which has ballooned during the boom, had not responded to the squeeze.

Bankers readily acknowledged that the country was overbanked and that a country of 1.2 million people did not need over 50 banks. The Central Bank, too, had no doubts about its objective. The governor, Abdul Malik al-Hamar, said on numerous occasions that "we want fewer banks, better quali-ty banks and stronger banks." The question, however, was how to achieve this aim when the banks were often linked inextricably to family, tribal and emirate ties and a lot more was at stake than just

The political and social dimensions of the merger issue have been compounded by the Central Bank's relative inability to enforce certain requirements, but this is changing. As one Dubai banker put it: "You can't have a shotgon wedding in this society; force will not work here. The shareholders simply have to come to grips with the problem."

This year, either through gentle

concept has gained momentum and new bank's capital and reserves the latest, during April, Abu Dhabi's three commercial banks — Federal Commercial Bank, Khaleej Commercial Bank and Emirates Commercial Bank - combined to form the emirate's second largest bank, the Commercial Bank of Abu Dhabi, with a paid-up capital of \$340 million and assets of nearly

The much-rumored merger of the three commercial banks follows the takeover in January of the small Dubai-based Emirates National Bank by Union Bank of the Middle East, which is now 73-percent owned by the Dubai government. One of the ironies of the changing face of Emirates banking is that UBME is now one of the vehicles for implementing the government strategy; less than two years ago the Dubai government had intervened to prop up the bank when its principal shareholders were Abdul Wahab Galadari's two brothers, Abdul Latif and Abdul Rahim.

In both takeovers the respective banks had run into serious liquidity problems and had major loan port-folio difficulties. UBME is believed to have paid \$400,300 for the Dubai Bank shares but details of the arrangements for both deals are unclear and complicated by the government involvement.

In Abu Dhabi, the local governpersuasion or the realities of a rement is expected to inject around cession-hit economy, the merger \$327 million of new funds into the

three bank mergers have taken and to provide for the three banks place over the last four months. In bad loans. Under the plan the government will take a 60-percent stake in Commercial Bank of Abu Dhabi and the remaining shares divided between the three banks.

The pattern that has emerged this year is that the government or government-owned bank provides the necessary cash injection to make stronger banking units. This seems the only possibility since almost all the prospective merger candidates suffer from the same problems of bad loan portfolios. inadequate liquidity and weak management. A mere merger would only compound the prob-

The Central Bank has been slowly tightening up the system. With the introduction of new regulatory measures in January on bad loans and presentation of balance sheets the structural problems in many of the smaller banks are becoming

As the economy is unlikely to provide any bonuses or a turnaround for the banks, their deteriorating performance, especially in relation to loans, is expected to lead the smaller institutions into mergers with the bigger state-controlled banks. For many, including some of the 29 foreign banks, a justifiable rationale or market strategy no longer exists, but it seems clear that the authorities are anxious to avoid the outright collapse of even the smallest institution.

Military Necessity Is Forcing Closer Cooperation

By Robert Bailey

LONDON -The spillover risks from the long-running war between Iran and Iraq have been highlighted by the growing number of attacks on ships in the Gulf by both belligerents in the last 12 months. The atmosphere of violence has given greater legitimacy to the United Arab Emirates' heavy initiary spending of the last few years. However, such expenditure has proved to be of limited value in building up a viable deterrent to aggression.

The compromises inherent in the fragile makeup of the U.A.E. are reflected in federal policies toward defense questions. On one hand, the dominance and concern of Saudi Arabia to establish a coordinated effort through its leadership of the Gulf Cooperation Council is recognized by the participation of the Abu Dhabi armed forces in the GCC's Peninsula Shield military exercises.

On the other hand, both historical and longer-term considerations are recognized by the maintenance of full

diplomatic relations with Tehran. Most cooperation between the U.A.E. and Iran ended with the fall of the shah and the individual emirates have only small, though concentrated, Shiite Moslem minorities, compromising not much more than 6 or 7 percent of the population.

However, Dubai, despite the Iranian revolution and the war, has maintained a healthy re-export trade with Iran, while Sharjah remains dependent for its oil wealth on

Relations with both its major neighbors in the region, Saudi Arabia and Iran, have been complicated by rivalries among the individual emirates themselves since independence, particularly between Abu Dhabi and Dubai. An example of this occurred in 1978, when the U.A.E. president, Sheikh Zayed bin Sultan al-Nahayan of Abu Dhabi, named his son, Colonel Sultan bin Zayed, as commander in chief of the federation's armed forces without consulting either the federal prime minister, success and al-Maktum, the ruler of Dubai, or Sheikh Rashid's either the federal prime minister, Sheikh Rashid bin

The appointment ied to a temporary withdrawn of Dubai's forces from the joint U.A.E. communic But although the old-style family rivalnes are never likely to go away entirely, lower oil revenues and the aged to acquire increasingly sophisticated defense systems, as well as the threat from Iran, are forcing greater cooperation in security matters.

The U.A.E.'s complicated, expensive and still chasing search for security started after Britain ended its military role in the Gulf in 1971. Since then, the U.A.E. has maintained one of the highest per-capita defense expensi-tures in the world. The 1984 budget allocation was 6.25 billion dirhams (\$1.86 billion) for a country with a popula-tion of 1.2 million, half of whom are foreign workers. The foreign element is evident in the federation's 43,000-man armed forces, which has a high proportion of recruits from Baluchistan as well as Pakistani, Jorda and British contracted officers.

Construction Projects Favor Local Contractors

By Toby Odone

LONDON - The United Arab Emirates has maintained its position as the fifth or sixth largest construction market in the Middle East since 1980. But with the exception of the defense sector most

Abu Dhabi, traditionally the richest and the biggest spender of the seven emirates, typified the move away from the large projects of the late 1970s and early 1980s to the smaller projects that are of greater interest to local companies than to the international set.

While Abu Dhabi and Dubai. with their long established source

of revenues from their oil, have slowed down their development have control over what the other programs, Sharjah has taken off emirates do - only over Abu and is using the revenues from the Dhabi." was the way the minister Sajaa gas and condensate field to of petroleum and mineral re-develop a long-term industrial sources. achieved respectable condensate products of around 13,000 barrels a day. There is a limited building boom of villas and palaces but Crown Prince Sheikh Khalid is a cautious person who does not rush Bank singed the fingers of some lution, but Dubai's merchants are into risky ventures. He has been reputable international banks, in- spreading their wings beyond the outspoken about the lack of leadership in the federation and would like to see more use being made of Sharjah's revenue from its ex- the Supreme Council, which is ports of condensate have enabled it made up of the seven rulers. Offito pay off old debts and recently cially, it meets very seldom, al-

Other emirates, without oil, pine for the days of federal and Abu Dhabi largesse. Fujairah is trying to capitalize on its strategic position outside the Gulf, but not very successfully; Abu Dhabi National Oil Co. frowns on a projected oil pipeline from Abu Dhabi oil fields to a Fujairah terminal.

Umm al-Quwain does well from its ruler's friendship with Sheikh Zayed and has a quietly prosperous air, without a great deal of activity. Ajman has a bad-debt problem, caused by projects that failed to attract federal funding. It has tried and failed to draw investors from other parts of the Gulf, who in a number of small ways have contributed to the economies of the other nonoil emirates.

A Political Federation

(Continued From Previous Page) to find oil. It also has rock, which is hinterland and into the poorer both used locally and exported to emirates, bringing long-awaited in- other Gulf States. frastructure projects and services

centralization in - and, hence, domination by - the capital is ates. anathema to a group of political entities in which each ruler sees himself as the one who has to shape the destiny of his state and of those people whose loyalty he wants to

Therefore, competition between the seven emirates is vigorous, with local authorities keen to explore a multitude of avenues to enhance the economic prospects in their respective states. While there was some experimenting with identical and sometimes uneconomical projects in the 1970s, most local anthorities now concentrate on seeing how they can best take advantage of their own particular geographical conditions and natural re-

Fujairah has quite naturally developed agriculture and fishing along with some small-scale manufacturing and a good new harbor. The emirate could become the U.A.E.'s safe oil-export terminal in the Indian Ocean.

Ras al-Khaimah is a major mar-

ket garden of the Emirates, and

Ajman has developed its ship-

building tradition, and it benefits from its geographical proximity to In other ways, however, the inev-Sharjah and Dubai, offering relaitable administrative and political tively cheaper housing to expatriate Umm al-Quwain remains a fish

Sharjah exports offshore oil and onshore gas liquids. It is making great efforts to become the spiritual center of the U.A.E. always in the forefrom with educational projects. exhibitions, book fairs, conference centers, theatrical competitions and a very outspoken press.

In Dubai, trade has been the key to the community's stunning economic success even after a successful oil export level had been

Dubai's singleminded pursuit of the goal of prosperity for itself does not fit easily into the overall pat-tern of the U.A.E. as a union in the making — even though the nature of the federation is to provide for a far larger scope for regional differences than a centralized state.

There is a widespread desire for the old spirit of unity of 1971 to be rekindled to counter the growing trend of isolating each emirate from the rest. It is hoped to achieve this with a new constitution

halt Abu Dhabi's participation at 60 percent, a policy that has been followed in the other emirates. The U.A.E. benefits from access to the the voracious Abu Dhabi Gas Liqtechnical expertise and marketing perfection Co., which was in danger experience of the oil companies. They, in turn, benefit from access of crude production cuts.

Abn Dhabi Gas raised Von the Berthartz opportunities. Profit margins for the companies are often low but in the long term, they say, the investment will be worth it.

Long-standing foreign share-holders in Abu Dhabi's oil (40 percent of the two main onshore and offshore concessions), Shell, Mobil, Exxon and Partex (Gulbenkian). There are also a number of more recent Japanese arrivals involved in the development of smaller fields and also mmority partners (12 percent) with the Abu Dhabi National Oil Co. in the giant upper Zakum offshore project

During 1983-84 the relatively high price of Abu Dhabi's light (39) high price of Abu Dhabi's light (39
API) Murban crude led to "two"
Abu Dhabi to the fast-expanding problems, namely the thorny issue of differentials — a wider OPEC issue — and that of marging the superscript ing. Two-thirds of the way there is crude was consistently overpriced relative to its value on the open. market. Disposing of it was increasingly difficult, and in November the government temporarily increased the margins provided the shareholders lifted their full entitlements. In January this year OPEC eased the differential problem, bringing down the price of Murban to \$28.15 and in February fresh

margins were agreed, slightly lower than November's. Abu Dhabi still has problems selling its crude, as the minister of petroleum, Mana al-Oteiba, point-ed out recently. Most of it goes to Japan, supplies partly from the shareholders but principally from ADNOC's 60-percent share of production. This is stricity tied to the official price, which sometimes makes it difficult to move. The result has been temporary cuts in onshore production even below the OPEC ceiling. Offshore production cannot be cut further below a minimum limit because associated gas is needed for the LNG plant on Das

ese customers have been turning to cheaper sources, notably Oman, which is not a member of OPEC. Their contracted purchases of Abu Dhabi crude are now down to 90,000 barrels per day for this

were moving toward full takeover, gas finds over the last year and Sheikh Zayed bin Sultan al-Na-development of the Khuff field is hayan of Abu Dhabi decided to going ahead to reinject 250 million cabic feet a day into the Uweinat formation. Uweinat cap gas is now providing at least half the needs of

Abu Dhabi Gas raised production in 1984 over 1983 (when it was affected by technical problems) as a result of this additional supply. But it, too, has had to bargain with Japanese customers (Tokyo Electric exclusively for its LNG and others, through equity holders BP and Compagnie Française de Pétrole, for its LPG) because of the

Emirates has been the gas condenhost of foreign oil companies of all

The discoveries include Dubai's reis a day of condensate since early last year and reinjecting the eas. Sharjah's Sajaa field now produces about 60,000 barrels a day of condensate and is flaring 400 million cubic feet a day of gas, having sold only about 100 million cubic feet a day for a remarkably high price to Emirates General Petroleum Co. for power generation in the north-

trole, for its LPG) because of the ing some of the gas and piping. The uncertainty of federal au-link bewieen the price of crude and some onshore for cement kilns. In thority as a whole is most clearly Abu Dhabi, Amoco is exploring a demonstrated in oil matters. The

The most interesting develop- continuation of the Margham-Sa- minsiter of petroleum, Mr. alment in the last few years in the jaa structure; its first well found. Oteiba, has the unenviable task of noncommercial quantities of gas combining the roles of chairing the condensate and is now drilling a OPEC production monitoring

There is little new downstream activity in the Emirates despite rumors. Sharjah has gone ahead with its \$300-million LPG plant in partnership with Amoco and the Japaeign investors reckon is too high.

Oil observers criticize Sharjah's flare but in present market condi-tions the government's hesitancy is understandable. Agreement is reported to have been reached with Dubai for purchase of Sharjah gas for power generation; Dubai needs the gas, and anything would be better than Sharjah flaring it. But relations between the two emirates There is also Ras al-Khaimah's are still clouded by their border offshore Saleh field, now produc- dispute, which also affects delineaing about 13,000 barrels a day, flar-tion of their respective oil fields.

committee, heading the federal ministry and also Abu Dhabi's De-

Dubaí does not feel bound by the ministry, and Abu Dhabi has therefore, had to bear the brunt of Margha field, a concession owned nese but the proposed fertilizer cuts in OPEC production quotas by Arco and Britoil, which has plant has foundered on the price of Dubai's offshore production (from been producing about 25,000 bar- the feedstock, Sajaa gas, which for- rapidly declining reserves) is at least 360,000 barrels a day and the Dubai government refuses to be bound by OPEC decisions on the grounds that it produces less than Abu Dhabi anyway. Condensate

> OPEC's quotas. There is no sign that Federal National Council pressure on the authorities to rationalize and reactivate the economy on a federal basis is likely to make any impression on each emirate's determination to preserve independent control of hydrocarbon resources and

Before the market opened the Federal Re-serve Board said that U.S. industrial production fell 0.2 percent in April. U.S. business inventories fell 0.1 percent in March, the Commerce Department said later.

AT&T was near the top of the active list and nigher at midday. Western Union and Federal National Mora-

gage Association were also active and higher. Bank stocks moved higher. Citicorp, Chas Manhattan, Mannfacturers Hanover, Chemical New York, Marine Midland and Bankers Trust were all up.

IBM and Digital Equipment were up. National Semiconductor was unchanged.

General Motors and Chrysler were higher Ford was off slightly.

LTV Corp. was off.
TWA and UAL Inc. were lower. Unocal was off slightly. The company said it was extending the expiration date of its pending exchange offer. Seagram was up after withdrawing a plan for a new class of shares.

Crown Zellerbach Corp. was easier. British financier Sir James Goldsmith said he increased his holdings in the corporation to slightly more than 20 percent from 19.9 percent. Arkla Inc. was off on weakened expectations

that a takeover for that company is imminent. CBS was unchanged at 110. The company said it had filed suit in New York against Ziff-Davis Publishing Co. and Touche Ross & Co. in an action related to the acquisition of 12 Ziff-Davis con ner publications.

WALL STREET WATCH

Men's Long Skirts in Vogue As Investors Turn Bearish

By EDWARD ROHRBACH

ARIS — Men's skirts are "all the rage in New York." according to a newspaper item cited by Edward S. Hyman Jr. of Cyrus J. Lawrence Inc., called "Wall Street's favorite economist." He comments: "That has to be bearish for the stock market," since a photo accompanying the article shows a sheepish, bespectacled man who is wearing a long skirt and is about to step out into traffic Mr. Hyman's whimsical point, of course, is that the relationship between rising hemlines on women's skirts and rising stock

ship between rising hemilines on women's skirts and rising stock prices has long been recognized—so men wearing long skirts has to be too much even for Wall

While the fashion world may be questioning America's and the stock market's manliness, Stan Weinstein, editor and publisher of the Professional Tape Reader, evokes the traditional macho image

& Horis

As administrative of transport of the last of the last

Some investors are tiring of taking punishment on Wall Street.

in his latest commentary:

"Like a prizefighter feigning with his right hand and then jabbing with his left, this market is bobbing and weaving and totally confusing the street. More and more investors are throwing in the towel and becoming bearish as the market whipsaws

But that is giving up too early, he believes, because the Dow-Jones Industrial Average is "overstating the market's weakness" and there is "sub-surface strengthening taking place."

FT Mr. Weinstein, who relies solely on technical analysis, is more sure of Wall Street's favorable trend over the distance than he is about the next few rounds. For one thing, he does not like the way General Motors's has been

His top groups for investment are broadcasting, drugs, hospital companies, oil-related concerns and restaurants. Sectors to avoid are aluminum stocks, autos, auto parts and semiconductors.

This contention that investors are getting tired of taking punishment on Wall Street is reflected in the latest "decision-makers" poll conducted by Richard B. Hoey, economist at Drexel

Between February of this year and April "optimism about the stock market declined abruptly," he disclosed, according to responses from 106 big institutional investors such as banks and nsion funds. He calculates his Institutional Sentiment Stock Index by subtracting from the percentage of investment managers expecting to be in a bull market in three months the percentage a bear market.

In February, the index reached the highest level of the 1984-85 period at 45.1 percent, as 56.1 percent of the those surveyed believed that the stock market would be in a bull market in three months, with only 11 percent expecting to be in a bear market by May. But two months later, optimism had waned as the index dropped 38.5 percentage points to 6.6 percent, the lowest level in

Describing the index as a "useful intermediate-term contrary opinion indicator," Mr. Hoey added, "Thus, we take the crosion of the extreme optimism of February as an encouraging sign for

The firm's director of research, Burton M. Siegel, put it this way: "Consensus expectations have plummeted in recent weeks and now they incorporate most of the disappointing news.

Positive surprises have become more likely."

Noting that the key assumption behind Drexel Burnham's market optimism is the sustainability of the economic cycle, Mr. Siegel continued: "The recession and growth recession senarios that are attracting great interest are likely to recede as favorable economic data are reported later this spring and summer. The negative company earnings surprises and the adjustments in (Confinued on Page 13, Col. 3)

Speakes Calls S&L **Units Safe**

But Maryland Acts on Crisis

WASHINGTON - As steps were being taken to resolve the crisis among Maryland's savings and loan associations, Larry Speakes, the White House spokesman, said Wednesday that the U.S. federal savings and loan system "is safe and protected."

Asked if there is any concern in the White House over the federal system in view of the Maryland savings and loan situation, Mr. Speakes replied: "The federal system is safe and protected. We're monitoring the situation at the Treasury. It has been discussed at the White House, but these are

Both Chio and Maryland have undergone problems with savings and loans associations. The governor of Maryland, Harry Hughes, took control Tuesday of the state's 102 savings and loan associations that do not have federal insurance and called the state legislature into emergency session Friday to consider a new insurance plan to protect investors.

A run by nervous depositors on Maryland's privately insured sav-ings and loans eased Wednesday, but measures taken to save the shaky thrifts disrupted business activity in the state.

Mr. Hughes, who declared a state of emergency Tnesday, met with Federal Reserve officials and a team of attorneys to search for solutions to new problems created by his decision on Tuesday to limit vithdrawals by depositors to \$1,000 a month.

Einer Johnson, the governor's chief of staff, said the state would set up a hotline to answer questions from nervous residents -- some trying to close deals on new houses or pay large bills or payrolls.

But Mr. Johnson said it was unlikely Mr. Hughes would make ex-ceptions to the withdrawal limit, imposed to stop the drain on assets at the state-chartered savings and

"There are no plans to modify that at the moment," Mr. Johnson The reduction said. "We have to make a determion what kind of hot there. We want to staunch the flow

Nigeria's Foray Into Oil-Bartering

Its Swaps Have Depressed World Prices, Traders Say

By Bob Hagerty memanional Herold Tribu

LONDON - A spate of oil-bartering by Nigeria is helping to depress petroleum prices, traders say, and more such sales are in the works.

Barter — or countertrade, as the more complex arrangements are called — in recent years has become a major selling method for many members of the Organization of Petroleum Exporting Countertrades. tries, notably Iran, Algeria, Libya and Saudi Ara-bia. But Nigeria, one of OPEC's biggest producers, has become a big user of countertrade only in

Already, it has reached agreements involving \$1 billion worth of spare parts and other goods from Brazil; \$500 million in assembly kits for Peugeot cars, refined sugar and other products from France, and \$200 million worth of machinery, steel and other building materials from Austria's state-owned Voest-Alpine AG.

Comtertrade allows oil producers to give well-disguised discounts from official OPEC prices. Though the producers generally deny this motive, "You don't undertake a barter deal if you can sell crude at official prices," said Mehdi Varzi, an oil analyst at the London stockbrokerage of Grieve-

son, Grant & Co.

The oil market in general has been weak recently, and it is difficult to isolate one factor from another. But traders note that Nigerian crude prices have fallen more steeply than some other

widely traded crudes.

Petroleum Argus, a trade newsletter, reports that Nigeria's Bonny light crude is quoted on the spot, or noncontract, market at around \$26.80 a barrel. That is down about \$1.30 from two months ago and compares with the official price of \$28.65 a barrel, Forcados, a lower-grade Nigerian crude, was quoted Wednesday at around \$26.70 a barrel, down \$1.50 from two months ago. Nigeria's Bonny medium has slumped \$1.80.

Britain's Brent blend and West Texas Intermediate, a widely traded U.S. crude, are down less than \$1 from their mid-March levels. Nigeria's oil minister, Tam David-West, said in

ered their prime rate last month, to percent prime rate. A basis point is 10% percent, the major U.S. banks one hundredth of a percentage have posted a 10.5-percent prime since mid-January. No other major bank followed Bankers Trust's lead

a telephone interview from Lagos that his country was trying to structure its countertrade in a way that would avoid undermining the market. The minister added that he was analyzing how the new practice was affecting spot prices.

"I owe nobody any apologies for doing counter-trade — provided we do not rock the boat," Mr. David-West said.

In theory, countertrade need not rock the boat any more than cash sales do. In practice, however,

For one thing, countertrade allows producers to pump more crude than they would if they relied solely on cash sales. Oil executives estimate that Nigeria in recent months has been producing about 1.7 million barrels a day, well over of its OPEC quota, which the Nigerians define as 1.45

Mr. David-West declined to comment on such estimates, but he said Nigeria next week would be hosting KMG Klynveld Kraayenhoff & Co., a Dutch accounting firm recently hired by OPEC to monitor members' production. "Our doors are

Dornier Holder Ends Resistance To Daimler Pact

By Warren Getler

International Herald Tribune
FRANKFURT — A battle for control of Dornier GmbH coded Tuesday when Claudius Dornier, the senior shareholder of the fam-

ily-owned concern, agreed to a plan ito sell a 68-percent stake in the company to Daimler-Benz AG.

Under the plan, Mr. Dornier would retain a 20-percent stake in Dornier, West Germany's secondlargest aerospace group with 1984 sales of about 1.6 billion Deutsche marks (about \$520 million). The plan must be approved by the Federal Cartel Office, where no major objections are foreseen.

The takeover, if approved, would make Daimler one of West Germany's leading military contractors. The automaker earlier this year acquired full control of MTU GmbH. a major maker of engines for mili-tary aircraft with 1984 sales of 2.2 billion DM. About half of Dornier's sales are military-related, a Domier spokesman said.

Mr. Dornier, the only one of six family shareholders who originally objected to the Daimler takeover plan announced April 23, said Wednesday in a telephone interview that he felt he could not go against the wishes of the company's work force and the government in

his effort to block Daimler's bid. Under terms of the company founder's will, Mr. Dornier holds de facto veto power over the sale of stock to outsiders.

Mr. Dornier, whose stake would rise from a current 12.8 percent under terms of the agreement with Daimler, had the legal option of buying shares of the other family members before those shares could be offered to outsiders. He had held, out for a 25-percent stake, which under German law would have granted him veto power over management decisions.

on other short-term loans to smallquirements, was around 8.40 and medium-size businesses, Large On the eve of Daimler's Apri announcement, a large majority of at rates below the prime rate, while Dornier's 9,000 employees had vot-ed in favor of Daimler's acquisition many smaller borrowers frequently proposal, which also was strongly The prime has been falling since Sept. 27, when it was cut to 12.75 endorsed by the regional govern-ment of Baden-Wuerttemberg percent from the 13-percent level where the two companies are locat-that had prevailed for three ed. The last time the prime government would become a miwas cut was Jan. 15, when it was nority shareholder, taking a 4-perduced by a quarter percentage cent stake, while the res percent would be held by Claudius' (Reuters, UPI). brother, Silvius.

Union members at Domier had become increasingly agitated over Mr. Domier's resistance to the Daimler plan and were understood to be set on calling a strike if the future ownership of the company

were not settled promptly.

Justus Dornier, Claudius' step-brother and a rival for controlling influence within the company, said in an interview that other family shareholders had repeatedly warned the elder Dornier in recent weeks that they "did not want to see the clock turned back" on Daimler's plan. He said his step-brother's opposition to the Daimler agreement broke down because "Claudius could not come up with

a viable alternative." "With Daimler's acquiring ma-jority control, we re-establish credi-bility at Dornier." Justus said. "Dornier has never been a company with financial troubles; the shareholders have created prob-

lems, not the company itself."

Claudius Dormer had said repeatedly that his objection to any outside group acquiring majority control of the company derived from a desire to observe the testament of his father, the company founder. He declined to elaborate (Continued on Page 13, Col. 4)

Dollar Is Mixed In Europe Trade

LONDON - The dollar was mixed Wednesday as markets responded unevenly to a drop in U.S. industrial production. The U.S. Federal Reserve Board announced Wednesday that industrial production fell 0.2 percent in April, the first decline since last October.

Currency dealers said trading was quiet ahead of Thursday's Ascension Day holiday in many European countries.

In London, the British pound closed at \$1.2628, down from \$1.2748 on Tuesday. The dollar ended in Frankfurt at 3.0835 Dentsche marks, up from 3.0613 DM; in Zurich, at 2.5775 Swiss francs, up from 2.5725 Swiss francs; and in Tokyo, at 250.175 Japanese yen, from 250.75 yen.

China Imposes New Tax On Foreign Businesses

By Rick Gladstone The Associated Press

BEIJING - China announced Wednesday an unexpected tax on foreign companies retroactive to Jan. 1, in what some Westerners saw as evidence that the country's hard-currency reserves are down

and the government needs cash.

The 15-percent "enterprise income tax" will be levied on foreign offices that earn money from services and consultation, reports in

the state-run press said.

They also said a 5-percent "industrial and commercial tax" would be levied on all foreign, Hong Kong and Macao enterprises

Overseas business representa-tives and Western diplomats, who spoke on the understanding that they not be identified, linked the tax to a recent tightening on Chinese spending, delays on loan re-

Nissan Agrees To Purchase U.S. Supercomputer

WASHINGTON - Nissan Motor Co. has agreed to buy a multimillion-dollar U.S.-made supercomputer for its Japanese design facilities after negotiations that were seen as a test of apan's willingness to purchase

U.S. high-technology products. The contract, which Nissan announced Tuesday in Tokyo, was awarded to Cray Research Inc. a Minneapolis company considered the world leader in

significantly on the spending of The newly appointed director of the People's Bank of China, State Councillor Chen Muhua, is known

Enterprises liable for the new tax appear to include the China-hosed offices of more than 60 foreign banks, which offer consulting and liaison services to foreign clients but are restricted from conducting

ordinary banking activities. Several foreign law and account-ing firms have also set up representative offices in China to provide consultancy services for economic contracts between Chinese and

overseas partners. The reports said the enterprise income tax would apply to all offices receiving comm bates, fees and other income for providing consultation, market surveys, liaison and other services to

chents in China They quoted Jin Xin, director of the Finance Ministry's general taxation bureau, as saying that such offices would be taxed "no matter where the payments are made, whether in China or elsewhere."

Asked whether this might discourage foreign businesses from coming to China, the Foreign Trade Ministry spokesman, Huang Wenjun, said if they "come to China just to have general contacts, then there will be no taxation."

The announcement coincided with the end of a visit by the U.S. commerce secretary, Malcolm Bal-drige, who said he had complained to the Chinese about the high cost of doing business in China.

Foreign businesses have long

protested what they call "hidden

taxation" by the Chinese govern-ment, including high prices for la-bor and supplies and 100-percent duty on imported equipment. Foreigners must hire all Chinese help through a government-run agency, which in some cases charges 10 times the amount the Chinese employees receive in

All of these securities having been sold, this announcement appears as a matter of record only.

United Press International
BRASILIA — Brazil will begin
talks with the International Monetary Fund this month to obtain
financing for its huge foreign debt
over an 18-month period, according to Francisco Dornelles, the finance minister.

He said Tuesday that the talks would be aimed at procuring funds to help pay Brazil's \$102.4-billion foreign debt, the world's largest, for an 18-month period, Mr. Dornelles, who began talks with banks last week in the United States, said Brazil would negotiate simultaneously with the IMF and private bankers.

bankers.

He said talks with the IMF could focus on setting targets for Brazilian economic performance. "We are going to insist on realistic targets so the country will not go into recession," he said. Mr. Dornelles said Brazil should receive IMF credits worth \$1.2 billion in 1985, slightly less than officials anticipated at the beginning of the year.

Inflation in Sweden Increased During April

STOCKHOLM — Swedish con-sumer prices rose 0.4 percent in April from March to a level 7.8 percent above that of a year earlier, the government's statistics agency said Wednesday.

The agency, Statistics Sweden, said prices rose 2.7 percent in the first four mouths of the year, compared with an increase of 3.1 percent in the like period of 1984. Inflation in all

TOTAL TOTAL

NEW YORK -- Continuing its attempt to pare the huge debt accu-mulated in two bruising takeover battles within the last year, Phillips Petroleum Co. says it will sell several of its less valuable assets and offer early retirement to 10 percent of its U.S. work force.

The assets include interests in a California oil field and a refinery in Britain and an office building in Denver. Last month, Phillips, the 11th-largest U.S. oil company, put its coal and geothermal businesses

Commence of the commence of th on the market Analysis said the sale of the combined assets could bring Phillips between \$800 million and \$1 bil-

CBS Files Suit Against Ziff-Davis

United Press International NEW YORK - CBS Inc. filed suit Wednesday against 2fff Corp., charging the publishing company with fraud for allegedly overstating the operating earnings of 12 Ziff-Davis magazines that it sold to the

broadcaster early this year. CBS also sued Touche Ross & Co., the independent auditors for Ziff in the sale, which brought a record \$362 million for the group of specialty magazines that include Modern Bride, Car and Driver, and

Popular Photography.
The CBS suit contends that Ziff, which is privately held, allocated costs that should have been deducted from the magazine group's operating profits to the corporate side ton, and the company's office

"These are positive steps, but only the first steps," said John A. Martin, a research analyst with Provident National Bank in Philadelphia. "It seems likely that to alleviate their debt situation quickly, they're still going to have to look to their major producing, market-ing or refining assets."

Phillips ended 1984 with \$2.8 billion in debt, part of which was accumulated to prevent a takeover by T. Boone Pickens, the Texas oilman. It soon took on \$4.5 billion more to stave off another takeover attempt, this one by Carl C. Icahn. the New York financier. That brought its total debt to \$7.3 billion and produced a debt-to-equity ra-

In the aftermath of the leahn battle, the company pledged to quickly reduce its debt by 52 bilhon, and that pledge was reiterated Tuesday by C.J. Silas, Phillips's chairman and chief executive officer, and Glenn A. Cox, its presi-dent and chief operating officer, in meetings with employees at the company's headquarters in Bartlesville. Oklahoma.

tio of 80 percent.

"We're going to be a different company from now on," Mr. Silas told the employees.

The assets put up for sale Tuesday are a 25 percent interest in the Coal Point oil field in California; the company's fertilizer opera-tions; its mining-chemicals business; natural gas liquids plants in North Dakota: an interest in the Philmac bitumin refinery in Britain; oil and gas production proper-ties in the Netherlands and other areas; undeveloped land in Hous-

building in Denver.

SEOUL - Hyundai Motor Co. nies. reported Wednesday that its car exports in the first four months of this year rose 140 percent from a year earlier to 27,101 units.

The South Korean automaker said January-April shipments were worth \$120 million. No comparable figure was given for a year ago. Hyundai said Canada was the biggest buyer during the past four months, taking 15,985 of two Hyundai models — the subcom-

pact Pony and the compact Stellar. Hyundai's headquarters in Seoul declined to give the number of cars shipped to Canada a year ago, but its sales arm in Canada, called Hyundai Auto Canada, reported over the weekend that Hyundai's car sales in Canada during the period increased 330 percent compared

with a year earlier. One main attraction for Hyundai cars sold overseas is their prices, reportedly lower than foreign counterparts.

model is sold in Canada for between \$5,000 and \$6,000, Hyundai is the biggest South Korean automaker and dominates

the country's car exports.

Company officials said the Pony

Belgian Bank Lowers Rate

Resters BRUSSELS - The Belgian National Bank said it will cut its bank rate to 91/2 percent from 91/4 percent, effective next Monday. The rate on ordinary advances will be cut to 10 percent from 10½ percent, also beginning Monday.

Wall Street

Murdoch Says He Plans to Sell 2 Papers

History Press Intermetion

NEW YORK -- Rupert Murdoch has told a congressional committee that he plans to sell two of his daily U.S. newspapers — the New York Post and the Chicago Sun-Times, The New York Daily News

The newspaper quoted Representative Matthew I. Rinaldo, a New Jersey Republican, as saying that Mr. Murdoch told him and other members of the House telecommunications subcommittee at closed meetings Tuesday: "I'm going to sell both newspapers. But I feel really badly about the Chicago Sun-Times because it's doing so well

Mr. Murdoch's plans are part of a \$2-billion agreement with Metromedia Inc. to buy seven of its television stations, including one in New York and one in Chicago. The Federal Communications Commission prohibits anyone from owning both a daily newspaper

and a television station in a major media market.

"I will be complying with all rules and regulations," the News quoted the Australian publisher as saying. Mr. Murdoch also plans to become an American citizen to speed up the transaction. The News reported that lawyers for Mr. Murdoch said he had no intention of seeking help from the Congress or the FCC to hold on to the the Sun-Times and Post.

HUNGARY A CONFERENCE ON TRADE AND INVESTMENT OPPORTUNITIES

SPONSORED BY THE INTERNATIONAL HERALD TRIBUNE Budapest, June 13-14, 1985

The International Herald Tribune conference on "Trade and Investment Opportunities in Hungary" will be of keen interest to any executive concerned about future economic relations between East and West.

The conference provides an extraordinary opportunity for business leaders to examine how the Hungarian government is approaching questions of domestic and international economic relations and offers Western executives an unusual occasion for direct contact with business leaders from Eastern Europe. Senior executives wishing to register for the conference should complete and return the coupon below.

JUNE 13 Keynote Addres Mr. József Marjai, Deputy Prime Minister

The Economic Outlook Professor József Bognár, Director, Institute of World Economics of the Hungarian Academy of Sciences Foreign Trade Mr. István Török, Secretary of State for Foreign Trade

The Five Year Plan Dr. János Hoás, Secretary of State, National Planning Board Afternoon Address Dr. Armand Hammer, Chairman and Chief Executive Officer,

THE COMPLETE LETTERS OF SIGMUND FREUD TO WILHELM FLIESS, 1887-1904

Translated and edited by Jeffrey Moussaieff Masson. 505 pages. Illustrated. \$25. Belknap-Harvard University Press, 79 Garden Street, Cambridge, Mass. 02138.

Reviewed by Christopher Lehmann-Haupt

Y OU PICK up this book expecting it to blow up in your hands. After all, it con-tains the complete letters written by Sigmund Freud to his friend and colleague Wilhelm Fliess, which means that it adds 133 previously shed items to the 168 letters that composed "The Origins of Psycho-Analysis," whose English-language edition first appeared

And, after all, it was these 133 letters that set off a chain reaction whose main explosions included the following controversial events: the falling out between the present volume's editor, Jeffrey Moussaieff Masson, and the trustees of the Sigmund Freud Archives over the significance of the letters; the assertion by Masson in his 1984 volume, "The Assault on Truth: Freud's Suppression of the Seduction Theory," that the letters revealed how Freud, in developing his psychoanalytic theories, had dishonestly denied the evidence of actual seductions of children by their parents in 19thcentury Vienna, and the publication of Janet Malcolm's book, "In the Frend Archives," which deftly traced the history of the entire unseemly affair.

But what impresses one about "The Com-plete Letters" are the peaceful perspectives unfolded in its pages. Surprisingly enough, this results from the meticulous scholarship that Masson seems to have applied to his project. He is above the battle here, throwing no punches and digging no elbows. His energy has gone into putting the letters in their proper historical perspective, into painstakingly correcting the errors of "The Origins of Psycho-Applysis" into annotating observe references. Analysis," into annotating obscure references in the correspondence.

Indeed, Masson has done such a conscientious job that one can't even distinguish between the old letters and the newly published ones unless one troubles to consult the appendix as one reads along. The most dramatic result of this seamless melding is that there appears to be no dramatic revision of the

seduction theory. Just as one had always heard, Freud at first took his patients literally when they reported the sexual assaults inflicted upon them when they were children, then decided, because of the statistical unlikelihood of such prevalent abuse, that these "assaults" must have been fantasized. Masson even takes pains to clarify and sharpen Freud's rejection of his earlier views, which would seem to counteract Masson's assertion of Freud's dishonesty.

What absorbs one instead, reading Freud's letters to Fliess, is the peculiar nature of their relationship. It is a one-sided view, of course. retationship. It is a one-sided view, of course, because, except at the end, we get only Freud's side of the correspondence. But if one may be permitted to draw the briefest thumbnail sketch of the friendship as it emerges in these pages, it began with passionate courtship on Freud's part, gradually subsided into gentle patronization (interrupted by the subtle but savage satisfaction that Freud seems to have savage satisfaction that Freud seems to have derived from Fliess' medical blunder in the Emma Eckstein affair), and finally collapsed because Freud had outgrown his friend.

Why did Freud need Fliess' friendship? There are pitfalls and dragons here, and material for a thousand monographs, not a few of them focusing on what Freud refers to in an unpublished 1910 letter to Sandor Ferenczi as the greater independence that results from having overcome my homosexuality."

But the drama one plays out in one's mind as one reads this volume is that here are these two characters, one in Berlin, the other in Vienna, characters, one in Berlin, the other in Vienna, working on these absolutely off-the-wall ideas. Freud starts off proposing, among other things, that neurasthenia is caused by masturbation in males and transmitted to the normal females they marry. Fliess is working on a theory relating the nose to the sexual organs. Freud sends Fliess patients with sexual problems. Fliess performs surgery on their noses. lems. Fliess performs surgery on their noses.

In time (and in a series of drafts that unfold dramatically in these pages) Freud constructs the foundations of psychoanalysis. He writes "Studies of Hysteria," "The Interpretation of Dreams," and other masterworks. Meanwhile, Fliess continues with the nose, develops a theory of periodicity that sounds like the ancestor of biorhythms, and proposes that left-handedness is a sign of homosexuality. The friendship grows strained. Fliess throws a tantrum because Frend has insufficiently acknowledged his ideas on bisexuality. Freud apologizes. Fliess rejects the apology. The relationship ends. This, at least, is the way that I would draw it if I had to do "The Complete Letters" for Classic Comics.

Meanwhile, what became of the seduction theory? What was all the biting and scratching about? In the sequel to the first Classic Comics I would depict Jeffrey Masson engaged in a titanic Occipal struggle with the elders of the Freud Archives. Or maybe I would have him ranting like the man in the old Philadelphia Bulletin advertisements, just trying to draw attention to himself.

In any case, he has got his way. He has created a fuss that makes us want to read "The Complete Letters of Sigmund Freud to Wilhelm Fliess." There, instead of a minefield, we find a landscape where scholars may safely graze. It is an unlikely outcome of a war, and Masson should be given all due credit.

Christopher Lehmann-Haupt is on the staff of The New York Times.

BRIDGE

By Alan Truscott

played in four hearts down one. In the replay, South perse-vered to five diamonds, hoping that at least one side could make a game contract.

Against five diamonds doubled West led the club jack, a conspicuous singleton. Now everything hinged on the play of the trump suit, and simple percentages would suggest a fi-nesse. But there were two objectives to that. In the first place, it would run the risk of a large penalty if the finesse lost,

for West would no doubt score at least one club ruff.

More significantly, South calculated that the trumos were unlikely to divide evenly. The bidding suggested that the hearts were 5-5, and if West. held five spades he might well have prefered a different action over one diamond. So. West's distribution was far more likely to be 4-5-3-1 than 5-5-2-1. East was likely to have

fy his leap to game.

So South played the diamond ace at the second trick and was rewarded with 11 international match points.

Eastern Conference final playoff Meanwhile, Denver evened the Western Conference final by blow-

ing out Los Angeles, 136-114.
"The 76ers didn't show up in the third quarter," said the losers' Julius Erving. "You have to play all four quarters to play basketball — winning basketball. The next two

NBA PLAYOFFS

games, on Saturday and Sunday, vill be in Philadelphia. Only four NBA teams have ever won best-ofseven series after losing the first

The 76ers, with the NBA's fourth-best regular-season record, led by 13 in the second quarter, but managed just 18 points — to Boston's 32 - in the third period, when Johnson had 10 points and Parish 9 points and 8 rebounds.

Boston hit only one-third of its first-half floor shots. "We could have crumbled," said Coach K.C. Jones. "They went ahead by 8 to 10 points. At halftime we just talked about what we weren't doing. We weren't running the offense with my semblance of patience." The Celtics improved to 47.5 percent from the field in the second half. For the game, they outscored Phila-delphia by 32-18 from the foul line.

Leading by 52-46 at the half, Philadelphia fell behind for good when Larry Bird's lay-up made it 64-63 with 4:53 left in the third per-iod. The Celtics widened to 78-70 entering the final quarter, when Bird scored 13 of his 24 points and the lead ranged from 4 to 10 points. It was the second consecutive ame in which Boston held the

76ers under 100 points (the Celtics won Sunday's opener, 108-93). In stretching its home playoff, winning streak to 10, Boston was led by Bird's 24 points, and 22 each from Johnson and Kevin McHale. Parish had 13 points and 16 rebounds. Erving had 22 points; teammate Moses Malone had 20.

The 76ers led, 58-53, before Parish started a 9-point run with a falltwo goals by Gretzky and Kurri's away jump shot. Johnson had 6

Fignon to Miss Tour de France

PARIS - Cyclist Laurent Fignon, winner of the Tour de France for the past two years, will not compete in the 1985 tour because of tendimitis in his left Achilles tendon, it was an-nounced Wednesday. Fignon, 24, is scheduled to have corrective surgery on Thursday.

Fignon brushed Bernard Hinault aside as France's top nider in 1983 with a victory in his first Tour de France, the world's most prestigious cycling event. Fignon won the threeweek tour again last year as his Renault dominated from the

Yankees' Late Rally Again Defeats Twins

Compiled by Our Staff From Dispatches

field goals by Malone and Erving,

NEW YORK — Trailing by 7-3 here Tuesday night, the Yankees had the Minnesota Twins right where they wanted them. For the second straight game, New York came from way back to defeat the Twins, Ken Griffey's grand-slam home run climaxing a six-run seventh inning that rallied the Yankees to a 10-7 victory. In Monday night's 9-8 triumph, the Yankees

had overcome an 8-0 deficit and won on Don Mattingly's three-run homer in the ninth. On Tuesday, they sent 10 batters to the plate in the seventh and received five walks from three relief pitchers, paving the way for their comeback.

With one out in the inning Willie Randolph

singled off Pete Filson, who then walked Don Mattingly and Dave Winfield. Rick Lysander came on and walked Don Baylor, forcing in Randolph. Curt Wardle took over, and walked Butch Wynegar — making the score 7-5 — before Griffey deposited Wardle's first pitch over the right-field wall for his third homer of the year and his third career grand slam. Baylor gave the Yankees an insurance run in the eighth with an RBI double. Reliever Brian

Fisher pitched 3% innings for his first majorleague victory.
Tim Teufel and Roy Smalley had three hits apiece for the losers, and every Minnesota start-

er had at least one hit except Mickey Hatcher and Gary Gaetti, whose respective hitting streaks of 10 and 8 games were halted.

"My guys came out swinging the bats," said Minnesota Manager Billy Gardner. "We lost a tough one last night and put seven runs on the board tonight. It's about time the pitchers started doing their part." Said Yankee Manager Billy Martin: "Hold them to less than nine runs and you'll win.'

Royals 5, Orioles 3 In Baltimore, home runs by Frank White, BASEBALL ROUNDUP

George Brett and Jun Sundberg highlighted a five-run fourth, Kansas City's biggest inning of the year, as the Royals got past the Orioles. Mariners 5, Red Sox 0

In Boston, Mike Moore scattered seven hits to shut down the Red Sox and record his first shutout since August 1983.

Blue Jays 6, Angels 3

In Toronto, Damaso Garcia, who went 8-for-13 with seven runs batted in during a weekend sweep of Seattle, stroked a two-out, two-run single in the sixth to break a 3-3 the and boost the Blue Jays past California. Tigers 4, Range.s I

In Detroit, Lou Whitaker raised his league

leading batting average to .366 by going 3-for-4 (including his second home run in two games) as the Tigers defeated Texas. White Sox 2, Indians 1

In Chicago, Greg Walker's two-out single in the eighth drove home Ozzie Guillen from sec-

ond base to give the White Sox their squeaker A's 6, Brewers 3

In Milawukee, Dusty Baker's two-run pinch-hit double broke a 2-2 tie and keyed a five-run Oakland ninth against reliever Rollie Fingers. Cubs 8, Dodgers 3

In the National League, in Los Angles, short-stop Larry Bowa had two hits and drove in two runs as Chicago defeated the Dodgers, Bowa, 39, started because 22-year-old rookie Shawon Dunston had been struggling with a .194 average (he had also made nine errors). After the game, the Cubs announced that Dunston had

been demoted to their Triple-A farm club in Des Moines, lowa.

Giants 3, Pirates 1

In San Francisco, Mike Krukow doubled twice and drove in two runs - in addition to pitching a five-hitter — to pace the Giants. Krukow lowered his earned-run average to 1.45 in registering his third complete game of the

Padres 6, Cardinals 2

In San Diego, Andy Hawkins gave up five hits, including homers to Andy Van Slyke and Darrell Porter, before departing in the sixth, but still improved his record to 7-0 as the Padres beat St. Louis. Hawkins benefited from a threerun home run by Kevin McReynolds, who has hit in nine straight games, driving in 10 runs during that stretch.

Mets 3, Braves 1

In Atlanta, Roger McDowell pitched 4% innings of perfect relief and combined with Calvin Schiraldi on a three-hitter as New York won for the seventh time in eight games. The Braves lost for the sixth time in their last seven outings, Rick Mahler dropped his second straight after a 7-0 start and Dale Murphy, who went 0-for-4 (he struck out twice), saw his hitting streak end

Astros 10, Expos 0 In Houston, 17 hits - four by Craig Reynolds and three each by Jerry Mumphrey and Bill Doran — along with eight walks and three helpful errors enabled the Astros to bury the

Phillies 7. Reds 1

In Cincinnati, Juan Samuel and Mike Schmidt homered (Samuel drove in five runs in all) to help Philadelphia end a seven-game los-

the ball as Randolph got the bad news from the plate umpire.

Trying to score on a fly ball, Willie Randolph seemed to have a leg up in a first-inning collision with Minnesota catcher Mark Salas. But Salas made the tag, above, and held on to

ART BUCHWALD

Banking Citizen of Year

Dear Freddy, me for some time. But I'm writing to ask you if you would attend a dinner in which I'm going to be honored as the "Good Citizen of the Year" at the Grand Milkwood Hotel on June 3.

I guess you've been wondering what happened to me since I stopped selling encyclopedias door-to-door in Bethesda. Well. believe it or not. I'm a hotshot banker in Mary-

I know what you're thinking. What do I know

about banking after selling en-Buchwald cyclopedias for the last 10 years? lt's a business just like any other business. People are always looking for bargains and if you can offer em a better deal than the guy down

the street you've got a customer. Banking is really a snap if you know anything about human na-ture. The trick is to have a solidlooking building with lots of marble and a guard standing by the door with a gun on his hip, who looks real serious about protecting the customer's deposit.

Since I pay more interest than other banks in the area, the money just keeps pouring in.

People are standing in line in front of my window right now with paper bags full of currency, scared silly our safes will be full up before they can open an account with us.

I don't have any problems at-tracting deposits. My difficulty is figuring how to spread it around. Heh, heh, heh. What I mean, Freddy, is that, if I'm paying 7 percent to the depositors, I have to loan it out at 15 percent to make

Well, fortunately, there are a lot of people in the United States who than the going rate to borrow monreason or another.

These guys and dolls are salt of opers, commodities speculators, oil drillers, takeover artists and horseracing enthusiasts.

Besides the money I make on

Jan. 2, 1985 loans, my bank also invests with lear Freddy,
I know you haven't heard from go-go securities firms in Florida and New Jersey. They pay us interest rates you wouldn't believe.

The depositors are getting rich. businessmen are getting their loans and the bank is earning a huge

return on its money.

The reason I'm being made "Citizen of the Year" is that I have just bought new uniforms for the high school football band, and the people of Milkwood don't know how to say thank you. Hope you can

May 10, 1985 Dear Freddy, The dinner has been called off.

I don't know if you saw it in the papers or on TV but my bank has been taken over by the state. What happened was this dipsy-doodle se-curities outfit in Florida walked away with our money.

We could have survived that, but the news of our losses got into the papers, and suddenly the depositors made a run on the bank. It was a small run until the TV

stations showed the people with their beach chairs and paper bags waiting to take their dough out. Then all hell broke loose.

Obviously we couldn't give everybody their money back since it was all out on loans or lost somewhere in the swamps of Florida and

New Jersey.
What with the unfortunate publicity, the bank examiners decided to come in with their crummy little hand calculators. They found some minor discrepancies on the books, which they claimed were fraudulent but which were really little mistakes in bookkeeping.

They also said I took out several million dollars for my own personal expenses, which they're going to have to damn well prove.

Anyway, the governor is blazing mad and the people who lost their are more than willing to pay more savings are kinda upset, so we decided to postpone the "Citizen of ey. Most of them were turned down the Year" dinner until I could work by the other banks for one silly out some sort of plea bargain with the attorney general.

Besides, I'm now living in the the earth. They're real estate devel- Bahamas and it's hard to pin me down for a date when I can pick up the award.

All the best, George

Growing Up on TV: Britain's '7 Up' Kids Are 28

By Georgia Dullea

New York Times Service
OS ANGELES — "What do
you want to be when you grow up?" becomes a provocative question when put to a group of 7-year-old British children and repeated every seven years until they are 28. The result is "28 Up." Michael Apted's award-winning documentary, which has touched audiences in the United States and abroad. It has also given educators and psychologists a rare longitudinal glimpse of the myste-rious process of growing up.

Shown recently as part of the Up" won wide critical acclaim Apted, 44, best known in the United States for "Coal Miner's Daughter," was a researcher at Britain's independent Granada Television in 1963 when the project had its modest beginning.
"At the time," he recalled re-

cently, "we were being fed a lot of stuff in England — the social revolution, the swinging '60s and 'You never had it so good.' This was to be a kind of salutary tale about the class system."

He chose 14 children, not knowing he would follow them into adulthood, across continents, up and down dreams. They were rich, poor and middle-class. They came from cities, suburbs and farms. Ten were boys, four were girls. One was black. All looked into the camera and, in response to Apted's questions, poured out their views on such topics as love, work, money, class and race rela-

"What are your plans, John?" an upper-class 7-year-old was asked. John spoke confidently of private schools, "if I pass the exam, and then Cambridge." Cut to Paul, in a children's home, who

asked, "What's a university?"
The resulting program, "7 Up," was a sad, funny, touching, successful piece of television. The young researcher thanked his small subjects and wished them well. That, he thought, was that.

No one was more surprised than he when "7 Up" became a standard work in teacher colleges and psychology classes. Child development experts urged Apted, then a director at Granada, to film the same children as adolescents. It was a challenge, he recalled, "but also a burden because

Director Michael Apted with, from left, Jackie, Lynn and Susan.

I'm not a psychologist or an educator and I kept thinking, 'Am I asking the right questions?'

In "14 Up," the children hid from the camera. They appeared confused, self-absorbed and, in one or two cases, drugged. Though "21 Up" was more successful, its director admitted: "It was far more interesting to proessionals than general television

In the next seven years, Apted's filmmaking career flourished in the United States. Some said be had "gone Hollywood" and would not return to Granada for "28 Up." But he did. Two of his subjects refused to be interviewed; one had become a barrister - and the other a documentary filmmaker. Still, with the 12

left, the film came alive. "It catches fire at age 28," Apted said, "because it shows human beings making major decisions about their lives - careers, marriage, children. The dreams expressed as children, adolescents and young people must be measured against reality. They are adults now, painfully getting

Shown in Britain six months ago, "28 Up" won a television academy award. It is expected to be broadcast in the United States "28 Up" uses footage from the earlier films. The effect is similar to time-lapse photography: The

children seem to sprout, bud and blossom into maturity in seconds. Wives, husbands and children spring up beside them. If there is a star, it's Tony, from London's East End. At 7, he got into fights, stayed out too late and hated the rich. At 21 he was a bookie's runner after a failed career as a jockey. At 28 he is driv-

ing a cab, supporting a family and

parlaying his celebrity from the earlier films into bit acting parts. Apted recalled the young Tony: "I was convinced that little tear-away jockey boy would end up in prison because of his environment and the pressures on him. In the early interviews I dwelled on that and he kept saying. 'I'm not like that.' I didn't

believe him and I was wrong." Bruce, an almost saintly child of privilege, planned to be a missionary. After distinguishing himself at Oxford, Bruce taught mathematics in a poor part of London — at Tony's old school. His students are from Bangla-desh. Of all the subjects, only Bruce consciously set out to change his social class and succeeded, Apted said.

Two boys who fared better than might have been expected ended up leaving Britain. Paul, an orphan who vowed to remain a bachelor because a wife would force him to "eat greens," is a happily married, fairly prosperous bricklayer in Australia. Nick, born on a farm, of educated parents, longed to know "all about the moon." He became a nuclear physicist and is an assistant professor at the University of Wis-

Nick's outspoken wife is one of what Apted calls the film's "reflective girls." The wives of the film subjects are substitutes for the girls he wishes he had chosen in 1963. "We missed the boat by not choosing enough girls," he said. "Perhaps the most important cultural issue of our time is that choice between working and

At this point, he said, "our four girls have only got bigger and ful-

bringing up a family.

He added, however, that the women might "pay off" dramati-cally at 35. "As their children get older," he said, "they're going to have to make serious choices.

The three working class women, Jackie, Lynn and Susan, seem content at 28. Their marriages are solid, their children healthy and their homes better than the ones they grew up in. When the director asks if they think the rich have an advantage, one of them says:
"We never think about it for seven years until you come along and ask us again."
But it is the middle class that

intrigues Apted, an insurance in-spector's son and a Cambridge graduate who drifted into film. "In England," he said, "and to a lesser extent in this country, the lower-middle classes are hurting. All you hear in America is this nonsense about Yuppies, but once you get out of Los Angeles and New York you find that these young people are being hung out to dry."

Clearly, two of his middle-class

subjects, Neil and Peter, are hurting Both wanted to be astronauts when they grew up. Both come from Liverpool.

Neil was among the smartest and most charming of the children. He dropped out of college, suffered a series of nervous breakdowns and became a recluse. He roams the countryside in search of odd jobs.

· Peter, another promising child, is an embittered schoolteacher, railing against the Conservative government -- "the most incompetent, uncaring bloody shower we've ever had." He admits to being lazy and his wife says he looks "on the negative side of life before the positive."

Apted worries about the Peters of this generation. "That's a voice you don't often hear in the media," he said: "the voice of lowermiddle-class kids who grew up in the '60s and '70s on the wave of the brave new world, the education, the hope and the rest. Those people now are stuck. There's a stagnancy about them and it's

There is a larger tragedy in the film: Children who are bright, hopeful and spontaneous at 7 become distillusioned.

"Yes, it is tragic," Apted said, "but that's life, isn't it?"

PEOPLE

Sculpture by Max Ernst Sells at Record \$962,500

"Capricorn." a monumental bronze sculpture of a man with a buil's head and a siren by his side by Max Erust, was sold Tuesday night at Sotheby's in New York for \$962,500, a record for a work by the German-born Surrealist. A painting entitled "Summer Landscape" by the Austrian artist Egon Schiele tetched \$2.53 million and Baigneuses debout" by the French Impressionist Auguste Renoir was sold for \$1.98 million.

Mayor Edward I. Kech of New York loved "Mayor," the musical based on his autobiography, but it didn't go over so well with the realestate tycoon Harry Helmsley and his hotel-tycoon wife, Leona. Koch told the cast: "You read my book. You made it sing. You're wonderful." Helmsley drew some of the most barbed jokes in the off Broadway production, a satirical look at life and politics in New York. He and his wife left during

When Bob Hope arrived in the city where he was born to celebrate the 82d anniversary of that event, he said he felt right at home: London was full of Americans. Hope, whose family moved to Cleveland when he was 7, was the center of attention at a gala that drew celebrities including Prince Philip, hus-band of Queen Elizabeth II. Hope won't actually be 82 until May 29. He's not quite made it - another 10 days or so - but I think he'll make it," the prince said. "He's a very generous, kind-hearted chap. And occasionally he's quite funny." Hope was born in Eltham in southeast London. The gala, which raised \$28,575 for the Duke of Edinburgh's Award Scheme for young people, attracted a cast including Debbie Reynolds, Brooke Shields, Julio Iglesias and Chariton Heston. Π.

Pickle Packers International has named President Ronald Reagan Pickle Person of the Year because he "has gotten into a lot of pickles this year, but he has gotten out of them, 'too." Bill Moore, executive vice president of Pickle Packers International, said in Chicago that the president would receive an inflatable plastic pickle on May 23, the first day of International Pickle
